Mark G. Haenchen, M.S., J.D.  
Radiation Safety Officer  
Saint Louis University  
Office of Environmental Health and Safety  
1402 South Grand Boulevard  
St. Louis, MO 63104

Dear Mr. Haenchen:

Enclosed is Amendment No. 48 to your NRC Material License No. 24-00196-07 in accordance with your request.

If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9807 so that we can provide appropriate corrections and answers.

If you have any questions about this amendment please contact me directly at [colleen.casey@nrc.gov](mailto:colleen.casey@nrc.gov) (best) or 630-829-9841. My fax number is 630-515-1078.

This amendment incorporates the changes you requested in your letters dated May 7, 2020, May 29, 2020, and October 9, 2020.

These changes have resulted in modifications to Condition No. 10 and you will note that the authorization for Subitem No. 6 through 9.S. has been deleted. Condition No. 23 has been updated also.

In correspondence dated May 7, 2020, you indicated that you wished to release your former location of use at University Club Tower, 1034 South Brentwood Blvd, Suite 1120, St. Louis Missouri for unrestricted use. The NRC staff has reviewed your final status surveys.

Based on its review, the staff has concluded that all licensable radioactive material has now been removed from your former location of use at University Club Tower, 1034 South Brentwood Blvd, Suite 1120, St. Louis Missouri and residual radioactive material attributable to licensed activities does not exceed current NRC criteria. Based on these conclusions no further remediation or actions with respect to NRC regulated material is required for your former location of use and it is suitable for unrestricted use.

Your May 7, 2020, letter also requested that the location of use identified on your license in Condition No. 10.E. for SSM Cardinal Glennon Children's Hospital, 1465 South Grand Blvd., St. Louis, Missouri be removed from your license because this facility obtained its own NRC license and has only used licensed materials under its own license.

The enclosed document contains sensitive security-related information.  
When separated from this cover letter this letter is uncontrolled.

~~Official Use Only - Security-Related Information~~

M. Haenchen

- 2 -

No licensed materials were ever used at this facility under the Saint Louis University license.

Given these circumstances, we have verified that SSM Cardinal Glennon Children's Hospital has its own NRC license and had that license for several years before it was added to your license. SSM Cardinal Glennon Children's Hospital should never have been added to the Saint Louis University license since it had its own NRC license already and NRC cannot permit one location of use to be licensed for the exact same materials under two different licenses.

We have deleted SSM Cardinal Glennon Children's Hospital from your license at this time.

(RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system.

Pursuant to NRC's RIS 2005-31 and in accordance with 10 Code of Federal Regulations 2.390, the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability.

The RIS may be located on the NRC Web site at: <http://www.nrc.gov/reading-rm/doc-collections/gen-comm/reg-issues/2005/ri200531.pdf> and the link for frequently asked questions regarding protection of security related sensitive information may be located at: <http://www.nrc.gov/reading-rm/sensitive-info/faq.html>.

A copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you.

This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions.

Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture.

You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>.

We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

Sincerely,

A handwritten signature in cursive script that reads "Colleen Carol Casey".
