Good morning Mr. Lanman,

I wanted to confirm that we have received your amendment request dated March 23, 2021.

In your request you asked if an amendment to your Texas Department of State Health Services license is necessary. In order for the NRC to add an additional distribution location to your exempt distribution license, Truglo must provide an amended radioactive materials possession license for the additional distribution location. This is because the devices containing radioactive material would fall under Truglo's radioactive materials possession license.

Thank you,
Tomas Herrera
