**Subject:** Final Summary of 3/30/2021 Call w/LES re: Redundant IROFS  
**Date:** Wednesday, March 31, 2021 10:24:00 AM  
**Attachments:** [Call between NRC and LES 2021-03-30.docx](#)

---

On March 30, 2021, a call was conducted with Louisiana Energy Services (LES) regarding an amendment request to authorize the use of Redundant Items Relied on For Safety (IROFS). The following individuals participated:

- Kevin Ramsey, NRC
- April Smith, NRC
- Robert Williams, NRC
- Brannen Adkins, NRC
- Wyatt Padgett, LES
- Barry Love, LES
- Norma Wells, LES

An outline used during the meeting is attached. It lists the NRC staff concerns and the options going forward.

During the meeting, LES staff stated they believed the proposed change is an improvement because multiple IROFS are better than a sole IROFS. LES will need to consider its next step and may call the Chief of the Fuel Facility Licensing Branch to discuss further. With regard to the corrective action program, LES believes the current quality levels predate the 2014 approval to use non-cited violations for dispositioning Severity Level IV violations.
