Good afternoon, Kay.

The reports you sent look good. I would still like to see the team member survey once you receive it.

Thanks in advance,  
Tara

**Subject:** [External\_Sender] RE: RE: Question about contamination event

Good Morning Tara,

Attached is my summary and the Cardio Navix summary from the event last year. I have reached out to the local Manager to print off the Team Member survey from the NMIS program from that day.

**Subject:** FW: RE: Question about contamination event

Good afternoon, Kay.

This contamination incident came up today and I wanted to follow up. This was the Rb generator cart that turned up contaminated at Henry Ford Hospital in MI. Was there ever an evaluation to determine that none of the NMTs were contaminated in anyway? If you have anything on this incident would you forward it to me?

Thanks in advance,

Tara

**Subject:** [External\_Sender] RE: Question about contamination event

Hi Tara,

I'm not exactly sure...but I don't think so.

The van number is Pet CT 105.

As a follow up... we believe the cart was contaminated while the QA was begun, probably before they completed the wipe on the incoming package. We can only deduce this from eliminating all other ways it could have happened.

We have reviewed the requirements and process for check in and the need to complete things fully before moving on to the next task. Also reviewed with our other Teams throughout the country providing this service.

**Subject:** [WARNING - EXTERNAL EMAIL] Question about contamination event

Were any of the MI inspections that were completed in 2019 the van that services Henry Ford Hospital? Going forward, I think we will need to keep track of the van # that was inspected and the location (including the hospital) where the inspection took place.

Always learning.

Tara
