Purpose: The purpose of this public meeting to collect comments on the new suite of human reliability analysis (HRA) methods built by the NRC, the Integrated Human Event Analysis System (IDHEAS), to handle all nuclear HRA applications. These applications include in-control room, ex-control room, Diverse and Flexible Copying Strategies (FLEX), fuel cycle, medical applications, etc. Members of the public will have the opportunity to provide comments on the IDHEAS General Methodology (IDHEAS-G), IDHEAS method for Events and Conditions Assessment (IDHEAS-ECA), human error data generalized to quantify human error probabilities (IDHEAS-DATA), IDHEAS dependency model, and database of Scenario Authorization, Categorization, and Debriefing Application (SACADA) for collecting operator training performance data.
