Re: NRC License 03-23853-01VA
Letter dated January 15, 2021, from Edwin M. Leidholdt, Jr., Ph.D.

Dear Mr. Parker:

This letter is to notify you that NHPP has completed its review of radiological survey information related to former radioactive material use and storage areas at 913 NW Garden Valley Boulevard, Roseburg, Oregon. The location was previously used under a permit for medical purposes under 10 CFR 35.100 and 35.200. Use under the permit at that street address occurred in a single building (Building 1).

The release information provided to NHPP by the facility's Radiation Safety Officer supported characterization of the location as a "Group 2" facility under NRC NUREG-1757, Vol. 1, Rev. 2, such that a decommissioning plan was not required under 10 CFR 30.36. In accordance with Paragraph 36.b. of the VHA-NRC Letter of Understanding, NHPP reviewed the release information and determined the location meets conditions in 10 CFR 20.1402 and is suitable for release for unrestricted use. NHPP has terminated the permit, ending authorization to use specifically-licensed radioactive material at the entire site at the NW Garden Valley Boulevard address. Building 1 will remain under the custody of the U.S. Department of Veterans Affairs and continue to be used for office and clinical purposes. This facility is not scheduled for closure; the facility remains active for delivery of medical services that no longer include the use of radioactive materials.

If NRC requires further information related to this permitting action, please contact me at 707-562-8374 or Clinton E. Abell, MSHP, at 501-708-5013.

Sincerely,

Edwin M. Leidholdt: Digitally signed by Edwin M.
