SUBJECT: SHEARON HARRIS NUCLEAR POWER PLANT – OPERATOR LICENSING
EXAMINATION APPROVAL 05000400/2021301

Dear Mr. Cahill:

The purpose of this letter is to confirm the final arrangements for the upcoming retake operator licensing examination at the Harris Nuclear Power Plant.

The U.S. Nuclear Regulatory Commission (NRC) has approved the subject examination. The NRC staff will administer the operating test during the week of April 12, 2021. The list with the applicant approved to take the examination has been provided to your office. The examination has undergone extensive review by my staff and representatives responsible for licensed operator training at your facility. Based on this review, I have concluded that the examination meets the guidelines of Revision 11 to NUREG-1021, "Operator Licensing Examination Standards for Power Reactors," for content, operational, and discrimination validity. By administering this examination, you also agree that it meets NUREG-1021 guidelines and is appropriate for measuring the qualifications of licensed operator applicants at your facility. If you determine that this examination is not appropriate for licensing operators at your facility, do not administer the examination and contact me at 404-997-4662.

Please contact your Chief Examiner, Mike Donithan, at 404-997-4538, if you have questions or identify any errors or changes in the license level (reactor operator or senior reactor operator) or type of examination (partial or complete written examination or operating test, or both) specified for the applicant approved to take the examination.

Sincerely,

/RA/

Eugene F. Guthrie, Chief
Operations Branch 2
Division of Reactor Safety
