

PROPOSED OUTLINE COMMENTS

Facility: CGS

First Exam Date: 2/22/21

Written Exam Outline (Date)		
Comment	Resolution	
1	Rejected K/A question 22. I will allow the change, but you have written an SRO level question to this K/A in 2017.	No action necessary

Administrative JPM Outline (Date)		
Comment	Resolution	
1	The descriptions of A1 and A5 are identical. A5 must be written to the SRO level, so the JPMs should be different.	Replaced with modified bank JPM.
2	Is A9 time critical?	Yes, noted a time critical
3	A3. "OFR" should be "FOR." "can not" should be "cannot."	Corrected typos
4	A9. "CLSSIFY" should be "CLASSIFY"	Corrected typo

Control Room / In-Plant System JPM Outline (Date)		
Comment	Resolution	
1	Though not a strict requirement, I would like to see either P1 or P2 as alternate path. As of now, none of the in-plants are alternate path, and would like to see one, and one that is performed by the upgrades.	Made P3 an alternate path and have the upgrade perform P3.
2	The (E) designation is for emergency or abnormal in-plant . None of the simulator JPMs should carry this designation.	Removed the designation.
3	The Upgrade cannot perform both S6 and P1 since they are both safety function 4. According to NUREG 1021, "all five SRO-U systems must serve different safety functions."	Changed the upgrade to perform P3 instead of P1.

Simulator Scenario Outline Comments (Date)		
Comment	Resolution	
1	Scenario 1, it is possible that events 4 and 5 are a single event. I'll need to see it in validation.	Verified separate events
