LISLE, IL 60532-4352

April 23, 2021

Andrea Kogelschatz
Radiation Safety Officer
NSF International
789 N. Dixboro Rd.
Ann Arbor, MI 48105

SUBJECT: RENEWAL OF RADIOACTIVE MATERIALS LICENSE FOR NSF
INTERNATIONAL, NRC LICENSE NO. 21-15209-02

Dear Ms. Kogelschatz:

Enclosed is Amendment No. 5 renewing your U.S. Nuclear Regulatory Commission (NRC) Materials License No. 21-15209-02, in accordance with your October 23, 2020 renewal application.

In addition, based on the licensed material and uses authorized in the license (unsealed radioactive materials for uses in calibration of laboratory radiochemistry instrumentation and preparation of laboratory quality control samples) the program code for your license will be changed from 3124 (Fee category 3P) to 3620 (Fee category 3M). For your references, the description of the program codes is posted on the NRC public website at <https://www.nrc.gov/materials/miau/mat-toolkits.html> and the materials license annual fee is in Title 10 of the *Code of Federal Regulations* (10 CFR) 171.16.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. NRC Region III office at (630) 829-9887 so that we may provide appropriate corrections and answers.

An environmental assessment for this action is not required because this action is categorically excluded under 10 CFR 51.22(c).

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation; or imposition of a civil penalty; or an Order suspending, modifying, or revoking your license as specified in the NRC Enforcement Policy. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance that NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy

statement and supporting material that may benefit your organization on NRC's safety culture Web site at <https://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice and Procedure," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's ADAMS, accessible from the NRC Web site at <https://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

Frank P. D. Tran
