RE: **Western Soil, Inc.**
NRC Inspection Report
No. 03020563/2018001

Dear Mr. Lew:

Our law firm is the legal counsel for Western Soil Inc. in reference matter.

Your letter addressed to our client on January 14, 2021 has been referred to my attention.

Please be advised that Western Soil, Inc. ceased operation on about the year 2015 due to the crisis of the construction industry in Puerto Rico. The company has not had any income from operations from said year on.

Western Soil's Inc. president Max Laracuente has tried to dispose of the equipment through a company specialized in the disposition of this type of equipment but they are requesting an upfront payment of \$10,000.00 to perform the work. Through Western Soil Inc. does not actually have the

\$10,000.00 to pay for the service its president is trying to sell other equipment in order to raise the funds to pay for the disposition of the equipment.

Our client, through its president is presently conductive efforts to:

- a) Return the equipment to the manufacturer;
- b) Retain a company who will pick up the equipment and deliver ot to the manufacturer;
- c) Negotiate with a third party who is interest in purchasing all the machines and will proceed to certify all of them.

I suggest you grant our client thirty (30) days to work on the three alternatives mentioned in the previous paragraph.

Should any questions arise, please contact us.

Truly yours,

Luis Roberto Santos Montalvo
