4. Provide the most recent leak test results (before the sources were transferred) for each of the sealed sources, if required.
5. Resubmit the NRC Forms 540 with appropriate signatures in Item 9 (Authorized consignee acknowledging waste receipt).
6. Please provide a final status radiation survey and contamination survey for all areas where radioactive material was used under the license:
 - a. A survey map providing contamination (in cpm and dpm) and radiation readings (mR/hr) keyed to specific locations within each room/lab where radioactive material was used and stored (a diagram of the facility with cpm/dpm and mR/hr readings/points shown on the diagram with description of the reading/point such as floor, countertop etc.);
