ARLINGTON TX 76011-4511

May 20, 2021

Mr. Jesse R. Toepfer
Radiation Safety Officer
Kennecott Uranium Company
P.O. Box 1500
Rawlins, WY 82301-1500

SUBJECT: TERMINATION OF NRC RADIOACTIVE MATERIALS LICENSE NO. 49-19005-01

By email dated April 27, 2021, Kennecott Uranium Company informed the U.S. Nuclear Regulatory Commission (NRC) that the licensee wished to terminate NRC radioactive materials license number 49-19005-01. The NRC Form 314 dated April 27, 2021, stated that all radioactive material had been transferred to an Agreement State licensed entity.

The supporting documentation to the NRC Form 314 provided copies of the most recent leak test results. The leak test results demonstrated that there was no evidence of leakage of radioactive material from the sealed sources contained in the fixed gauging devices authorized under NRC license number 49-19005-01. Based on the documentation submitted and a review of your historical file, the staff concluded that all radioactive material authorized under NRC license number 49-19005-01 has been removed from the facility located at Sweetwater Uranium Project, 2938 Minerals X Road, 42 miles Northwest of Rawlins, Sweetwater County, Rawlins, Wyoming 82301. This facility is suitable for unrestricted use in accordance with 10 CFR 20.1402, "Radiological Criteria for Unrestricted Use," with respect to radioactive material regulated under NRC license number 49-19005-01. Based on these conclusions, no further remediation or actions are required with respect to radioactive material regulated under NRC license number 49-19005-01.

Please find enclosed Amendment No. 15 to license number 49-19005-01 authorizing your license termination. An environmental assessment for this action is not required since this action is categorically excluded under 10 CFR 51.22(c)(20)(ii).

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

Roberto J. Torres, M.S., Senior Health Physicist
Materials Licensing and Decommissioning Branch
