ATTN: Docket ID NRC-2021-0099, Rulemakings and Adjudications Staff
Re: Exelon License Transfers

Dear Secretary,

We are writing today to request the opportunity for a full hearing on this matter. At the same time we are asking NRC to endeavor to provide more substantive information related to this corporate restructuring involving Exelon. To that end we are asking for more time for NRC to obtain and prepare this information and provide a meaningful record so that we are able to provide appropriate comments. Therefore we also seek a substantial extension of the comment period of 60- 90 days, after we receive additional information.

We have noted that this matter involving corporate restructuring involves a large number of nuclear reactor assets and storage facilities for spent nuclear fuel. The NRC has identified the action as largely involving license transfers and notes that it therefore involves no significant hazards consideration and no genuine issue as to whether the health and safety of the public will be significantly affected.

To the contrary, nuclear reactors and spent nuclear fuel involve hazardous operations and high level radioactive waste and significant nuclear risks. Financial arrangements and responsible parties have a great deal to do with significant hazards and whether they are adequately managed or result in catastrophic outcomes. Transferring nuclear reactor licenses is not equivalent to issuing library cards.

Thank you for your attention.

Sincerely,

A handwritten signature in black ink that reads "Barbara J. Warren". The script is cursive and fluid, with the first name "Barbara" and last name "Warren" clearly legible.
