**Date:** Friday, April 23, 2021 3:26:00 PM  
**Attachments:** [Model Delegation of Authority to RSO.docx](#)

---

Dear Mr. Western:

We have reviewed your amendment request dated March 10, 2021 for NRC Materials License No. 34-32780-04MD for Cardinal Health 414, LLC. We will need the following information.

1. The licensee proposed that any continuous air monitoring (CAM) filters obtained after a period of high airborne radioactivity or after a known event will be analyzed. Please describe how a period of high airborne radioactivity will be recognized and/or defined. In addition, describe any fixed frequency where CAM filters will be analyzed and/or bioassay will be performed (quarterly, biannual, annual, etc.)
2. Please confirm that the licensee will place the proposed portable CAMs at the areas in the room where the airborne level will likely be higher or equivalent to the worker breathing zone and CAMs will be maintained and operated in accordance with the manufacturer's manual and recommendations.
3. Provide a copy of a delegation of authority for the proposed RSO, Mr. Glenn P. Sullivan, with his signature accepting the role and responsibilities of the RSO (a sample is attached for your reference).
4. Based on NUREG-1556, Volume 12, Revision 1, please provide a copy of a bachelor degree diploma in science or engineering or describe equivalent training and experience in physical, chemical, or biological sciences or in engineering for Mr. Kevin Stahl.

We would appreciate if you could provide the response in writing with date and signature by May 25, 2021. If you have any questions, please feel free to reply to this email or call me at 630-829-9623.

Thank you,

*Frank Tran*
