Subject: [External_Sender] Yucca Mountain

I oppose any shipment of nuclear material to a central storage site. I oppose Yucca Mountain being used as a storage site or any other site where nuclear material has to be shipped.

H.R. 3053, the NUCLEAR WASTE POLICY ACT AMENDMENTS OF 2017. This bill is authored by Rep. John Shimkus (D.16 IL.), and has 7 Illinois co-sponsors at present, mostly those with nuclear plants in their districts or close ties to Exelon. Action on the bill had been postponed.

This bill would provide funds and plans to restart the demonstrably faulty Yucca Mt. project in Nevada; and would also begin the process and funding of “centralized interim storage” (CIS) facilities – allegedly “temporary” high-level radioactive waste (HLRW) storage facilities — operated by private companies (Illinois may be a potential candidate for one, BTW). Several sites are being targeted in West Texas and Southeast New Mexico. Both the Yucca project and the CIS facilities would result in massive numbers of shipments of spent reactor fuel traversing the nation’s deficient roads and rails, and possibly waterways.
