Re: NUREG-2243

I request you deny GE the right to a license to UNC/GE SUA-1475.

Instead the NRC should be working with the Red Water Pond Road community through the Navajo Nation EPA Superfund. Any plan that does not provide for moving the waste out of the area is totally insufficient. By working with the Superfund, you can develop a truly comprehensive plan that protects the current area and that does not simply relocate the waste in another community.

This community deserves to be protected and meets the very highest standards and the waste must be moved immediately. They have borne the brunt of our need for defense for far too long.

They deserve to have a cleanup that includes continued monitoring of air, soil, and groundwater.

Thank you for your consideration,
Mary A. Robert
