NRC needs to deny GE's request for a license amendment to UNC/GE SUA-1475.

The plan is insufficient, as it does not include the documented requests of the Red Water Pond Road community to move the waste out of the area.

NRC needs to work with Navajo Nation EPA Superfund to create a new alternative to move uranium waste OUT entirely, as safely as possible, and not to other already overburdened communities.

Clean up must be done to the highest standards including ongoing monitoring of groundwater, air, and soil.

Clean up needs to be immediate! The U.S. must not delay cleanup or base quality of cleanup on available funds.
