To NRC staff about this DEIS, related to:
NUREC-2243

I support the requests and demands of the Red Water Pond Road Community to transport all the radioactive waste from NECR away from their community. They also are respectful of the health and safety of other tribal communities such that none of that waste be deposited on their land and in their communities.

I hope you will decide to make your determination on the basis of American justice which our government has repeatedly denied to these fellow Americans. I'm from an all-white suburb of Los Angeles. I seriously doubt that beautiful valleys populated by white Americans would ever have been desecrated by the federal government and mining corporations. I believe white communities would have been fully informed and allowed to engage in the democratic process in order to voice their approval or opposition to any mining proposal.

I will not lash out at conscientious NRC staff members but sincerely request you empathize with the people of Red Water Pond Road Community and agree to their wishes. Let our government and GE corporation come up with the money for Alternative 2, as they have always been able to do, when necessary. This is necessary! Let all of us pay our respective shares and be proud of providing some justice and hope, belatedly at least, for these families and communities.

Regarding the methods of removal. There a few repositories, so that some waste should go to each of them. This should lower the cost a little.

EPA's request that the "potential threat waste site" be removed from this EIS must be denied.

Sincerely,
Don Hyde
