To Whom This May Concern,

There are too many abandoned uranium mines poisoning our communities for far too long. Many are dying a slow long death generation after generation. The nuclear waste, radiation exposure, radiation poisoning in our water, air, soil, and food chain is completely neglectful. We can no longer think of nuclear energy as a solution when a clean up effort has yet to begin.

It is time to do the right thing and clean up all the radiated abandoned sites and nuclear waste dumps.

No more digging up Mother Earth and leaving a path of death in the wake of uranium minings, mills, dump sites; then wanting more without cleaning up all the messes left behind.

The future is not in uranium for nuclear energy. There is more con than pro with well over 75 years of proof.

It is time to do the right thing and clean up all the radioactive waste, ASAP.

Most Sincerely,
Elizabeth Smith
