Referencing report number NUREG-2243

Dear U.S. NRC Officials,

Please deny GE's request for a license amendment to UNC/GE SUA-1475

The plan is insufficient, as it does not include the documented requests of the Red Water Pond Road community to move the waste out of the area.

It is important you work with Navajo Nation EPA Superfund to create a new alternative to move uranium waste OUT entirely, as safely as possible, and not to other already overburdened communities.

You must require clean up be done to the highest standards including ongoing monitoring of groundwater, air, and soil.

NRC it is your duty to your country and fellow citizens that clean up be immediate! The U.S. must not delay cleanup or base the quality of cleanup on available funds.

Sincerely, a concerned citizen,

Britt Martin

Glen Head, NY
