**Subject:** Additional Information Request for Amendment to Gogebic County Road Commission, Lic. 21-26558-01, CN624972  
**Date:** Friday, May 28, 2021 2:53:00 PM

---

Dear Mr. Miljevich:

Our office has reviewed your March 11, 2021 letter (NRC Agencywide Document and Management System Accession Number ML21083A207), and noted that additional information is needed to complete our review. I have also left a brief voicemail message at the phone number listed in the application.

**ADDITIONAL INFORMATION NEEDED:**

1. The letter transmitting the request to name Mark D. Miljevich (you) as Radiation Safety Officer (RSO) was also signed by you. For RSO changes, the NRC expects a the amendment request submission to come from licensee management or current RSO.  
**Please resubmit your request, signed by Mr. Bolick or other management representative.**
2. The letter indicated that you completed radiation safety training via the Troxler nuclear gauge safety training course and the Troxler RSO course. However, neither the dates of the training nor an indication of whether the training included a hands-on component were included with the application.  
**Please provide a copy of your Troxler Training Certificate, including the dates on which training was completed. If the training certificate is unclear as to any hands-on component, please include a description of your hands-on experience using nuclear portable gauges, as part of your response.**
3. The letter contained a request to change the gauge model number from the 3430 to the 3440. Please note that both the 3430 and the 3440 model gauges are included on the same sealed source and device registry certificate as 3400 Series. Accordingly, the gauge model may be updated to the 3400 Series to allow flexibility as to whether the 3430 or 3440 model gauge is used. To remove the 3430 model gauge from the license, it may be necessary to first add the 3440 model gauge authorization, and then remove the 3430 model once all final disposition information – including leak tests and letter confirming source receipt from a licensed entity – have been transmitted to NRC.  
**Please either (a) confirm that you wish to revise the model 3430 gauge authorization to the more generic 3400 Series or (b) provide final closeout information to remove the Model 3430 gauge from the license.**

Please submit requested information via a signed and dated letter. For quickest processing, please transmit your letter electronically, directly to me as a pdf file attached to an email message. If you have any questions regarding this request, please contact me at the email address or phone number listed below.
