License No. 06-30260-01
Docket No. 03034007
Control No. 626990

PLEASE CONFIRM RECEIPT OF THIS REQUEST FOR ADDITIONAL INFORMATION BY RETURN EMAIL

Good Morning Dr. Kosack;

This message relates to your letter dated May 7, 2021 informing the NRC Cottage Grove Cardiology, PC intends to join the Hartford HealthCare system. In order for us to continue our review, the following additional information is requested:

1. Your letter should have been signed by a management representative rather than Dr. Korsack. Please confirm that management has reviewed the letter and concurs in the statements and representations contained therein. Note also that a management representative should sign all future correspondence that requests a change in your license.

Transferee: A transferee is an entity that proposes to purchase or otherwise gain control of an NRC licensed operation.

Transferor: A transferor is an NRC licensee selling or otherwise giving up control of a licensed operation.

Information Needed for Transfer of Control

Licensees must provide full information and obtain NRC's **prior written consent** before transferring control of the license. Provide the following information concerning changes of control by the applicant (transferor and/or transferee, as appropriate). If any items are not applicable, so state.

2. Describe any planned changes in the organization, including but not limited to, transfer of stocks or assets and mergers, change in members on Board of Directors, etc. Provide the new licensee name, mailing address, and contact information, including phone numbers. Clearly identify when the amendment request is due to a name change only.
3. Describe any changes in personnel or duties that relate to the licensed program. Include training and experience for new personnel and any changes in the training program.
4. Describe any changes in the location, facilities, equipment, radiation safety program, use, possession, waste management, or other procedures that relate to the licensed program.
5. Describe the status of the licensee's facilities, equipment, and radiation safety program, including any contamination and whether decontamination will occur prior to transfer. Include the status of calibrations, leak tests, area surveys, wipe tests, training, quality control, and related records.
6. Confirm that all records concerning the safe and effective decommissioning of the facility will be transferred to the transferee or to the NRC, as appropriate. These records include documentation of surveys of ambient radiation levels and fixed and/or removable contamination, including methods and sensitivity.
7. Confirm that both transferor and transferee agree to transferring control of the licensed material

and activity, and the conditions of transfer, and that the transferee has been made aware of any open inspection items and its responsibility for possible resulting enforcement actions.

8. Confirm that the transferee will abide by all constraints, conditions, requirements, representations, and commitments of the transferor or that the transferee will submit a complete description of the proposed licensed program.

You may find guidance about changes of control in NUREG 1556, Vol. 15, Rev. 1. This guidance may be found using the following link: <https://www.nrc.gov/reading-rm/doc-collections/nuregs/staff/sr1556/v15/index.html>.

We will continue our review upon receipt of the above information. Please contact Robert Gallagher at (610) 337-5182 with any questions.

Regards,

Robert L. Gallagher
