**Subject:** [External\_Sender] RE: Nest on Intake Canal Bank

Hi Audra,

The turtle nested overnight and was not observed. IRG biologists have removed 3 adult female loggerheads since the nest was laid and all of the turtles were released in good condition.

Let us know if you have any additional questions.

Jodie

Thank you, Jodie. I'm happy to hear the nest was successfully relocated to the beach. Just a few questions: I assume the loggerhead female was in good condition? Was she released to the ocean in good condition? Also, I assume the loggerhead female was counted as a capture in the ITS?

Thank you,  
Audra

Hi Audra and Briana,

As discussed on the phone, a loggerhead nested on the intake canal bank on Friday night and was discovered during routine monitoring of the canal banks on Saturday morning (5/22/2021). The egg chamber was found and the nest was relocated to the beach at 07:30AM.

Please let me know if you need any additional information.

Thank you,

Jodie
