Subject: Pilgrim ISFSI-II Inspection
Date: Thursday, June 17, 2021 12:00:40 PM

On June 17, 2021, Region I physical security inspectors completed a security inspection of the ISFSI-II at Pilgrim using IP 81311, "Physical Security Requirements for Independent Spent Fuel Storage Installations." On-site inspection activities were conducted March 1-3, and June 14-17, 2021. The inspection covered the licensee's physical security plan, Revisions 19A and 20, and NRC Order EA-13-132, "Additional Security Measures," dated July 23, 2013.

Inspection activities included a review of the access authorization program for the ISFSI-II; verification and assessment of the licensee's testing and maintenance program to assure the functionality and reliability of security equipment, verification that a rapid, capable response to safeguards contingency events had been appropriately developed and effectively implemented, conducting interviews with responsible security personnel and plant employees, and performing walk-downs of the ISFSI-II.

Based on inspection activities conducted, the regional inspectors concluded Holtec Decommissioning International, LLC (HDI) demonstrated compliance with Order EA-13-132 for Pilgrim ISFSI-II.

More information will be documented in inspection report 07201044/2021401, to be issued within 30 days of today's date.
