

**UNITED STATES  
NUCLEAR REGULATORY COMMISSION**

REGION III  
2443 WARRENVILLE RD. SUITE 210  
LISLE, IL 60532-4352

June 15, 2021

Brandon Powell  
Radiation Safety Officer  
Cargill, Inc.  
1502 Wabash Ave.  
Lafayette, IN 47905

Dear Mr. Powell:

Enclosed is Amendment No. 10 renewing your NRC Material License No. 13-24550-01 in accordance with your request. Please note that VEGA Americas Corporation Model SR-A fixed gauging devices remain authorized on your license. To remove this authorization, you will need to provide a signed and dated letter which includes the following information:

- 1) A list (including the serial numbers) of all of the VEGA Americas Corporation Model SR-A gauges that you have possessed under your license
- 2) Records of transfer for each of the gauges to an authorized entity
- 3) Documentation of the final leak test results for each of the gauges
- 4) A discussion of the historical leak test data for the VEGA Americas Corporation Model SR-A gauges

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

In accordance with Title 10 of the Code of Federal Regulations (CFR) 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

Erin J. Kennedy  
Health Physicist
