

DOCKET NO.: 21-1134 : UNITED STATES COURT OF APPEALS

v. : :

N.R.C., et. al. : JUNE 29, 2021

UNDERLYING DECISION FROM WHICH APPEAL ARISES

The underlying decision from which this appeal arises is the N.R.C.'s denial of the Plaintiff's Petition PRM-50-117 (NRC-2019-0063), in which the Plaintiff had requested that the N.R.C. permit shuttered nuclear power reactors to be returned to service largely "as they were", without the need for costly upgrades, if their condition warranted so. In short, the Plaintiff had requested of the N.R.C. to "substantially ease the burdens currently placed on any operator seeking to return a shuttered plant to service."

Respectfully Submitted,

George Berka
Plaintiff / Appellant
