Subject: Request to name a new RSO - Ferris State University NRC license 21-152370-01
Date: Tuesday, May 11, 2021 2:43:00 PM

Good afternoon,

I reviewed your request dated 4/26/21 to name Ms. Hawkinsbadge as the new RSO, NRC license no. 21-15237-01.

In a signed and dated letter by the current RSO (Mr. McCormick) or senior manager, please provide the following:

1. Please provide Ms. Hawkinsbadge recent experience in using radioactive material under supervision. Specifically, provide dates, location (Ferris University) and name of the supervising individual, and a description of tasks (list radionuclides used, quantities, and tasks).
2. Please provide Ms. Hawkinsbadge recent experience in performing RSO duties (performing radiation surveys/contamination wipes, conducting material inventory, leak testing, processing badges and analyzing exposure reports, conducting audits, etc.).
3. Please provide an outline/syllabus describing the topics that were covered during the "Radiation Safety Officer" training taken in October 2020.
4. Please resubmit the Nuclear Gauge Safety Certification and the Hazmat Certification with the proper signatures (the provided certificates are not signed).

Please provide the response as a pdf document directly to me via email by June 4, 2021.

Please let me know if you have any questions.

Thank you

Magdalena R. Gryglak
Health Physicist
U.S. NRC Region III
