Subject: [External_Sender] Wyoming Statutes - Compatibility with NRC
Date: Thursday, July 08, 2021 4:21:36 PM
Attachments: [ARTICLE 21 - Small Modular Reactors.docx](#)
[ARTICLE 15 - Radioactive Waste Storage Facilities.docx](#)

Hi Kevin,

Stephen Poy and I had discussed sending you the Wyoming Statutes, attached, which are related to radioactive materials, but are not part of the current State Agreement with the NRC. Stephen informed me that these Articles may need to be reviewed by the NRC to ensure that Wyoming's Agreement maintains its compatibility with the NRC.

While Wyoming's Agreement with the NRC extends only to source and byproduct material involved in uranium or thorium recovery, Wyoming has these two sets of statutes, unrelated to the Agreement. These Articles, Article 15 and Article 21, deal with high-level radioactive waste storage within the State and the permitting of small modular nuclear reactors. While the Agreement State program in Wyoming (the Uranium Recovery Program) is not involved with either of these articles, they are part of the Wyoming Statutes.

Please let me know if the NRC has concerns with these statutes, as they relate to the state's Agreement with the NRC. Please reach out with any questions. Stephen Poy has a great deal of knowledge of our Agreement with the NRC and may be able to answer any questions you may have.

Thank You,

David Adams, CHP
