SUBJECT: Correction to Enclosure 1 Regarding the Request for Exemption Associated with Disposal of Specified Columbia Fuel Fabrication Waste (Docket No. 70-1151) (EPID L-2021-LLA-0101)

REFERENCE: 1) Westinghouse letter to NRC, LTR-RAC-21-42, "Request for Exemptions Associated with Disposal and Transportation of Specified Columbia Fuel Fabrication Waste" (ML21153A001)

Westinghouse Electric Company, LLC (Westinghouse) requested NRC approval for alternate disposal of specified low-activity radioactive materials from the Columbia Fuel Fabrication Facility (CFFF), License No. SNM-1107, for certain waste containing byproduct material and special nuclear material (SNM) (Reference 1).

The NRC staff recognized a discrepancy in Table 7.1 of Enclosure 1 to Reference 1. After some investigation Westinghouse determined that the "Bulk/IMC Truck Surveyors (disposal site)" calculated dose was inadvertently divided between eight workers in lieu of four. As this discrepancy was non-conservative, Westinghouse has enclosed a revised Table 7.1 for review by the NRC staff.

In conclusion, the revised calculated dose for the Bulk/IMC Truck Surveyors at US Ecology Idaho, Inc. remains a small percentage of the limit specified in NUREG-1757 and does not impact the results of the radiological assessment as presented in section 7.0 of Enclosure 1 to Reference 1.

Please contact me at (803) 647-2046 should you have questions or need any additional information.
