GROUP: A   **FOIA 2021-0177**

**RECORDS BEING RELEASED
IN THEIR ENTIRETY**

Thanks dana; appreciate the follow-up. For the record we don't regulate UFOs so I assume no need for additional action.

Subject: RE: Pilgrim Drone Spotting

The security manager got back to me. Plymouth PD arrived on site and it turned out that the object was actually much higher (thousands of feet) and indiscernible at that distance. FAA was contacted to no avail. MA State Police sent a helicopter, but even they couldn't identify the object. They think it might have been a weather balloon of some sort, but no one was definite. They are calling it a UFO.

Nonetheless, it doesn't appear to have caused any kind of threat to the site (distance) nor was it indicative of any kind of surveillance or suspicious activity that would meet criteria for a SIDS report so one was not made.

That should close this episode out.

Brett – last I heard the licensee wasn't sure if the flyover was a bird, plane, drone or superman. Tony et el did we ever hear back from Pilgrim regarding the potential drone sighting?

Thanks

Ray,

What happened with that? Did they eventually make a report?

Thanks.

Cheers,

Thanks – the air force said that a lot in the 50s as you may recall.

Last I had heard it may have been a weather balloon. I have to call the security manager in
a moment anyway so I'll ask about it.
