PUBLIC SUBMISSION

Docket: NRC-2021-0125

Holtec Decommissioning International, LLC Indian Point Nuclear Generating, Unit Nos. 1, 2, and 3 Post-Shutdown Decommissioning Activities Report

Comment On: NRC-2021-0125-0002

Holtec Decommissioning International, LLC; Indian Point Nuclear Generating, Unit Nos. 1, 2, and 3; Post-Shutdown Decommissioning Activities Report

Document: NRC-2021-0125-DRAFT-0004

Comment on FR Doc # 2021-15068

Submitter Information

Name: Buddy Buchanan

General Comment

During power operations the pathways for radioactive effluents are thru waste and vent systems that are continuously monitored. It is unclear from the Post-Shutdown Decommissioning Activities report that the new owner or the NRC has accounted for the potential for additional effluent pathways that could occur while transporting radioactive waste across the site or during segmentation and dismantling of contaminated equipment. It is expected that decommissioning and demolition activity could create dust and small debris that would get caught in storm runoff which could result in an unmonitored release to the Hudson river
