Subject: [External_Sender] NRC 2018-0300 No to Expanding Categorical Exclusions
Date: Tuesday, July 20, 2021 3:36:08 PM

Dear NRC Commissioner NRC Commissioners and Staff,

Dear NRC Commissioners and Staff:

I oppose NRC's proposed expansion of Categorical Exclusions (published 5-7-2021). It appears NRC wants to avoid legitimate controversy and generically exclude further public input on over a dozen important and controversial impacts from the nuclear power fuel chain. Public input needs to be solicited and listened to. The public has a lot to lose if regulations on the nuclear industry are loosened. A point to consider: WHAT WOULD YOU WANT IN YOUR NEIGHBORHOOD?? Let this be the bottom line.

Here are what I DO NOT want:

I do NOT want radioactive waste at any level released from nuclear control, to get into regular trash and commercial recycling, which could make everyday household items radioactive. This proposal could do that, despite decades of public opposition to "below regulatory concern" (BRC), "very low-level waste" (VLLW), and other generic exemptions from 10 CFR 20.2002 regulations.

I do NOT want even hotter nuclear waste to go to "low-level" waste sites.

I DO NOT want NRC to improperly reclassify actions which actually cause significant environmental consequences to avoid environmental review.

I DO NOT want NRC to assume there are no impacts from the numerous exclusions listed in the advanced notice of proposed rulemaking.

This proposal violates the National Environmental Policy Act (NEPA).

NRC has not "provide(d) a reasoned explanation for the change(s)," and each of them deserves its own environmental impact statement, NOT AN EXEMPTION.

DO NOT expand categorical exclusions. NRC should scrap this proposal and focus on reducing exclusions already allowed.

Here is what I DO want:

I DO WANT continued and increased surveillance of closed uranium mills.

I WANT more, not less, input on storage and transport cask designs.

I WANT more input, not less, on decommissioning plans and funding assurance requirements for reactors, uranium facilities and the proposed Consolidated "Interim" Storage facilities.

Sincerely,

Sincerely,
Janet Tache
