## **CHAPTER 16      TECHNICAL SPECIFICATIONS AND TECHNICAL REQUIREMENTS**

### **16.1   TECHNICAL SPECIFICATIONS**

Technical Specifications were proposed in accordance with 10 CFR 50.36 during the initial licensing of the plant. The Technical Specifications now reside in Appendix A of the Operating License for each unit.

Technical Specifications define plant variables, operating conditions, surveillance requirements, and administrative controls that are considered necessary to ensure the health and safety of the public.

**Intentionally Blank**

## **16.2 TECHNICAL REQUIREMENTS**

The Technical Requirements Manual (TRM) contains requirements for plant operation and surveillance of systems formerly contained in the Technical Specifications, along with other selected items. Some requirements were removed from the Technical Specifications as part of NRC and industry efforts to simplify Technical Specifications.

The TRM is controlled by station procedure, and a 10 CFR 50.59 review is required to change the TRM. Changes to the TRM may be made without prior NRC approval, provided that the changes do not involve a license amendment as defined in 10 CFR 50.59. Changes to the TRM that are implemented without prior NRC approval are reported to the NRC in accordance with 10 CFR 50.59. Proposed changes that involve a license amendment are reviewed and approved by the NRC prior to implementation.
