Subject: [External_Sender] NRC 2018-0300 No to Expanding Categorical Exclusions
Date: Tuesday, July 20, 2021 2:19:28 PM

Dear NRC Commissioner NRC Commissioners and Staff,

Dear NRC Commissioners and Staff:

I oppose NRC's proposed expansion of Categorical Exclusions (published 5-7-2021). It appears NRC wants to avoid legitimate controversy and generically exclude further public input on over a dozen important and controversial impacts from the nuclear power fuel chain. I do NOT want radioactive waste at any level released from nuclear control, to get into regular trash and commercial recycling, which could make everyday household items radioactive. This proposal could do that, despite decades of public opposition to "below regulatory concern" (BRC), "very low-level waste" (VLLW), and other generic exemptions from 10 CFR 20.2002 regulations.

I do NOT want even hotter nuclear waste to go to "low-level" waste sites.

I DO WANT continued and increased surveillance of closed uranium mills.

I WANT more, not less, input on storage and transport cask designs.

I WANT more input, not less, on decommissioning plans and funding assurance requirements for reactors, uranium facilities and the proposed Consolidated "Interim" Storage facilities.

I DO NOT want NRC to improperly reclassify actions which actually cause significant environmental consequences to avoid environmental review.

I DO NOT want NRC to assume there are no impacts from the numerous exclusions listed in the advanced notice of proposed rulemaking.

This proposal violates the National Environmental Policy Act (NEPA).

NRC has not "provide(d) a reasoned explanation for the change(s)," and each of them deserves its own environmental impact statement, not an exemption.

DO NOT expand categorical exclusions. NRC should scrap this proposal and focus on reducing exclusions already allowed.

Sincerely,

Sincerely,

Tara Mae

Dear NRC Commissioner NRC Commissioners and Staff,

Dear NRC Commissioners and Staff:

I oppose NRC's proposed expansion of Categorical Exclusions (published 5-7-2021). It appears NRC wants to avoid legitimate controversy and generically exclude further public input on over a dozen important and controversial impacts from the nuclear power fuel chain. I do NOT want radioactive waste at any level released from nuclear control, to get into regular trash and commercial recycling, which could make everyday household items radioactive. This proposal could do that, despite decades of public opposition to "below regulatory concern" (BRC), "very low-level waste" (VLLW), and other generic exemptions from 10 CFR 20.2002 regulations.

I do NOT want even hotter nuclear waste to go to "low-level" waste sites.

I DO WANT continued and increased surveillance of closed uranium mills.

I WANT more, not less, input on storage and transport cask designs.

I WANT more input, not less, on decommissioning plans and funding assurance requirements for reactors, uranium facilities and the proposed Consolidated "Interim" Storage facilities.

I DO NOT want NRC to improperly reclassify actions which actually cause significant environmental consequences to avoid environmental review.

I DO NOT want NRC to assume there are no impacts from the numerous exclusions listed in the advanced notice of proposed rulemaking.

This proposal violates the National Environmental Policy Act (NEPA).

NRC has not "provide(d) a reasoned explanation for the change(s)," and each of them deserves its own environmental impact statement, not an exemption.

DO NOT expand categorical exclusions. NRC should scrap this proposal and focus on reducing exclusions already allowed.

Sincerely,

Sincerely,
Edward Kadane

It appears NRC wants to avoid legitimate controversy and generically exclude further public input on over a dozen important and controversial impacts from the nuclear power fuel chain. I do NOT want radioactive waste at any level released from nuclear control, to get into regular trash and commercial recycling, which could make everyday household items radioactive. This proposal could do that, despite decades of public opposition to "below regulatory concern" (BRC), "very low-level waste" (VLLW), and other generic exemptions from 10 CFR 20.2002 regulations.

I do NOT want even hotter nuclear waste to go to "low-level" waste sites.

I DO WANT continued and increased surveillance of closed uranium mills.

I WANT more, not less, input on storage and transport cask designs.

I WANT more input, not less, on decommissioning plans and funding assurance requirements for reactors, uranium facilities and the proposed Consolidated "Interim" Storage facilities.

I DO NOT want NRC to improperly reclassify actions which actually cause significant environmental consequences to avoid environmental review.

I DO NOT want NRC to assume there are no impacts from the numerous exclusions listed in the advanced notice of proposed rulemaking.

This proposal violates the National Environmental Policy Act (NEPA).

NRC has not "provide(d) a reasoned explanation for the change(s)," and each of them deserves its own environmental impact statement, not an exemption.

DO NOT expand categorical exclusions. NRC should scrap this proposal and focus on reducing exclusions already allowed.

Sincerely,

Sincerely,

Mary Ann Holtz

We oppose NRC's proposed expansion of Categorical Exclusions (published 5-7-2021). It appears NRC wants to avoid legitimate controversy and generically exclude further public input on over a dozen important and controversial impacts from the nuclear power fuel chain. We do NOT want radioactive waste at any level released from nuclear control, to get into regular trash and commercial recycling, which could make everyday household items radioactive. This proposal could do that, despite decades of public opposition to "below regulatory concern" (BRC), "very low-level waste" (VLLW), and other generic exemptions from 10 CFR 20.2002 regulations.

We do NOT want even hotter nuclear waste to go to "low-level" waste sites.

We DO WANT continued and increased surveillance of closed uranium mills.

We WANT more, not less, input on storage and transport cask designs.

We WANT more input, not less, on decommissioning plans and funding assurance requirements for reactors, uranium facilities and the proposed Consolidated "Interim" Storage facilities.

We DO NOT want NRC to improperly reclassify actions which actually cause significant environmental consequences to avoid environmental review.

We DO NOT want NRC to assume there are no impacts from the numerous exclusions listed in the advanced notice of proposed rulemaking.

This proposal violates the National Environmental Policy Act (NEPA).

NRC has not "provide(d) a reasoned explanation for the change(s)," and each of them deserves its own environmental impact statement, not an exemption.

DO NOT expand categorical exclusions. NRC should scrap this proposal and focus on reducing exclusions already allowed.

Sincerely,

Sincerely,
Dudley and Candace Campbell

I do NOT want even hotter nuclear waste to go to "low-level" waste sites.

I DO WANT continued and increased surveillance of closed uranium mills.

I WANT more, not less, input on storage and transport cask designs.

I WANT more input, not less, on decommissioning plans and funding assurance requirements for reactors, uranium facilities and the proposed Consolidated "Interim" Storage facilities.

I DO NOT want NRC to improperly reclassify actions which actually cause significant environmental consequences to avoid environmental review.

I DO NOT want NRC to assume there are no impacts from the numerous exclusions listed in the advanced notice of proposed rulemaking.

This proposal violates the National Environmental Policy Act (NEPA).

NRC has not "provide(d) a reasoned explanation for the change(s)," and each of them deserves its own environmental impact statement, not an exemption.

DO NOT expand categorical exclusions. NRC should scrap this proposal and focus on reducing exclusions already allowed.

Sincerely,

Sincerely,
Kevin Walker

Subject: [External_Sender] NRC 2018-0300 No to Expanding Categorical Exclusions
Date: Tuesday, July 20, 2021 2:30:26 PM

Dear NRC Commissioner NRC Commissioners and Staff,

Dear NRC Commissioners and Staff:

I oppose NRC's proposed expansion of Categorical Exclusions (published 5-7-2021). It appears NRC wants to avoid legitimate controversy and generically exclude further public input on over a dozen important and controversial impacts from the nuclear power fuel chain. I do NOT want radioactive waste at any level released from nuclear control, to get into regular trash and commercial recycling, which could make everyday household items radioactive. This proposal could do that, despite decades of public opposition to "below regulatory concern" (BRC), "very low-level waste" (VLLW), and other generic exemptions from 10 CFR 20.2002 regulations.

I do NOT want even hotter nuclear waste to go to "low-level" waste sites.

I DO WANT continued and increased surveillance of closed uranium mills.

I WANT more, not less, input on storage and transport cask designs.

I WANT more input, not less, on decommissioning plans and funding assurance requirements for reactors, uranium facilities and the proposed Consolidated "Interim" Storage facilities.

I DO NOT want NRC to improperly reclassify actions which actually cause significant environmental consequences to avoid environmental review.

I WANT more, not less, input on storage and transport cask designs.

I WANT more input, not less, on decommissioning plans and funding assurance requirements for reactors, uranium facilities and the proposed Consolidated "Interim" Storage facilities.

I DO NOT want NRC to improperly reclassify actions which actually cause significant environmental consequences to avoid environmental review.

I DO NOT want NRC to assume there are no impacts from the numerous exclusions listed in the advanced notice of proposed rulemaking.

This proposal violates the National Environmental Policy Act (NEPA).

NRC has not "provide(d) a reasoned explanation for the change(s)," and each of them deserves its own environmental impact statement, not an exemption.

DO NOT expand categorical exclusions. NRC should scrap this proposal and focus on reducing exclusions already allowed.

Sincerely,

Sincerely,
Dana Sanchez

Subject: [External_Sender] NRC 2018-0300 No to Expanding Categorical Exclusions
Date: Tuesday, July 20, 2021 2:31:41 PM

Dear NRC Commissioner NRC Commissioners and Staff,

Dear NRC Commissioners and Staff:

I oppose NRC's proposed expansion of Categorical Exclusions (published 5-7-2021). It appears NRC wants to avoid legitimate controversy and generically exclude further public input on over a dozen important and controversial impacts from the nuclear power fuel chain. I do NOT want radioactive waste at any level released from nuclear control, to get into regular trash and commercial recycling, which could make everyday household items radioactive. This proposal could do that, despite decades of public opposition to "below regulatory concern" (BRC), "very low-level waste" (VLLW), and other generic exemptions from 10 CFR 20.2002 regulations.

I do NOT want even hotter nuclear waste to go to "low-level" waste sites.

I DO WANT continued and increased surveillance of closed uranium mills.

I WANT more, not less, input on storage and transport cask designs.

I WANT more input, not less, on decommissioning plans and funding assurance requirements for reactors, uranium facilities and the proposed Consolidated "Interim" Storage facilities.

I DO NOT want NRC to improperly reclassify actions which actually cause significant environmental consequences to avoid environmental review.

I DO NOT want NRC to assume there are no impacts from the numerous exclusions listed in the advanced notice of proposed rulemaking.

This proposal violates the National Environmental Policy Act (NEPA).

Subject: [External_Sender] NRC 2018-0300 No to Expanding Categorical Exclusions
Date: Tuesday, July 20, 2021 2:32:18 PM

Dear NRC Commissioner NRC Commissioners and Staff,

Dear NRC Commissioners and Staff:

I oppose NRC's proposed expansion of Categorical Exclusions (published 5-7-2021). It appears NRC wants to avoid legitimate controversy and generically exclude further public input on over a dozen important and controversial impacts from the nuclear power fuel chain. I do NOT want radioactive waste at any level released from nuclear control, to get into regular trash and commercial recycling, which could make everyday household items radioactive. This proposal could do that, despite decades of public opposition to "below regulatory concern" (BRC), "very low-level waste" (VLLW), and other generic exemptions from 10 CFR 20.2002 regulations.

I do NOT want even hotter nuclear waste to go to "low-level" waste sites.

I DO WANT continued and increased surveillance of closed uranium mills.

I WANT more, not less, input on storage and transport cask designs.

I WANT more input, not less, on decommissioning plans and funding assurance requirements for reactors, uranium facilities and the proposed Consolidated "Interim" Storage facilities.

I DO NOT want NRC to improperly reclassify actions which actually cause significant environmental consequences to avoid environmental review.

I DO NOT want NRC to assume there are no impacts from the numerous exclusions listed in the advanced notice of proposed rulemaking.

This proposal violates the National Environmental Policy Act (NEPA).

NRC has not "provide(d) a reasoned explanation for the change(s)," and each of them deserves its own environmental impact statement, not an exemption.

DO NOT expand categorical exclusions. NRC should scrap this proposal and focus on reducing exclusions already allowed.

Sincerely,

Sincerely,

Bill Michel

Subject: [External_Sender] NRC 2018-0300 No to Expanding Categorical Exclusions
Date: Tuesday, July 20, 2021 2:32:43 PM

Dear NRC Commissioner NRC Commissioners and Staff,

Dear NRC Commissioners and Staff:

I oppose NRC's proposed expansion of Categorical Exclusions (published 5-7-2021). It appears NRC wants to avoid legitimate controversy and generically exclude further public input on over a dozen important and controversial impacts from the nuclear power fuel chain. I do NOT want radioactive waste at any level released from nuclear control, to get into regular trash and commercial recycling, which could make everyday household items radioactive. This proposal could do that, despite decades of public opposition to "below regulatory concern" (BRC), "very low-level waste" (VLLW), and other generic exemptions from 10 CFR 20.2002 regulations.

I do NOT want even hotter nuclear waste to go to "low-level" waste sites.

I DO WANT continued and increased surveillance of closed uranium mills.

I WANT more, not less, input on storage and transport cask designs.

I WANT more input, not less, on decommissioning plans and funding assurance requirements for reactors, uranium facilities and the proposed Consolidated "Interim" Storage facilities.

I DO NOT want NRC to improperly reclassify actions which actually cause significant environmental consequences to avoid environmental review.

I DO NOT want NRC to assume there are no impacts from the numerous exclusions listed in the advanced notice of proposed rulemaking.

This proposal violates the National Environmental Policy Act (NEPA).

NRC has not "provide(d) a reasoned explanation for the change(s)," and each of them deserves its own environmental impact statement, not an exemption.

DO NOT expand categorical exclusions. NRC should scrap this proposal and focus on reducing exclusions already allowed.

Sincerely,

Sincerely,

Jonathan Memmert

Dear NRC Commissioner NRC Commissioners and Staff,

Dear NRC Commissioners and Staff:

I oppose NRC's proposed expansion of Categorical Exclusions (published 5-7-2021). It appears NRC wants to avoid legitimate controversy and generically exclude further public input on over a dozen important and controversial impacts from the nuclear power fuel chain. I do NOT want radioactive waste at any level released from nuclear control, to get into regular trash and commercial recycling, which could make everyday household items radioactive. This proposal could do that, despite decades of public opposition to "below regulatory concern" (BRC), "very low-level waste" (VLLW), and other generic exemptions from 10 CFR 20.2002 regulations.

I do NOT want even hotter nuclear waste to go to "low-level" waste sites.

I DO WANT continued and increased surveillance of closed uranium mills.

I WANT more, not less, input on storage and transport cask designs.

I WANT more input, not less, on decommissioning plans and funding assurance requirements for reactors, uranium facilities and the proposed Consolidated "Interim" Storage facilities.

I DO NOT want NRC to improperly reclassify actions which actually cause significant environmental consequences to avoid environmental review.

I DO NOT want NRC to assume there are no impacts from the numerous exclusions listed in the advanced notice of proposed rulemaking.

This proposal violates the National Environmental Policy Act (NEPA).

NRC has not "provide(d) a reasoned explanation for the change(s)," and each of them deserves its own environmental impact statement, not an exemption.

DO NOT expand categorical exclusions. NRC should scrap this proposal and focus on reducing exclusions already allowed.

Sincerely,

Sincerely,
Hal Pillinger

It appears NRC wants to avoid legitimate controversy and generically exclude further public input on over a dozen important and controversial impacts from the nuclear power fuel chain. I do NOT want radioactive waste at any level released from nuclear control, to get into regular trash and commercial recycling, which could make everyday household items radioactive. This proposal could do that, despite decades of public opposition to "below regulatory concern" (BRC), "very low-level waste" (VLLW), and other generic exemptions from 10 CFR 20.2002 regulations.

I do NOT want even hotter nuclear waste to go to "low-level" waste sites.

I DO WANT continued and increased surveillance of closed uranium mills.

I WANT more, not less, input on storage and transport cask designs.

I WANT more input, not less, on decommissioning plans and funding assurance requirements for reactors, uranium facilities and the proposed Consolidated "Interim" Storage facilities.

I DO NOT want NRC to improperly reclassify actions which actually cause significant environmental consequences to avoid environmental review.

I DO NOT want NRC to assume there are no impacts from the numerous exclusions listed in the advanced notice of proposed rulemaking.

This proposal violates the National Environmental Policy Act (NEPA).

NRC has not "provide(d) a reasoned explanation for the change(s)," and each of them deserves its own environmental impact statement, not an exemption.

DO NOT expand categorical exclusions. NRC should scrap this proposal and focus on reducing exclusions already allowed.

Sincerely,

Sincerely,

Douglas Kowalewski

I do NOT want radioactive waste at any level released from nuclear control, to get into regular trash and commercial recycling, which could make everyday household items radioactive. This proposal could do that, despite decades of public opposition to "below regulatory concern" (BRC), "very low-level waste" (VLLW), and other generic exemptions from 10 CFR 20.2002 regulations.

I do NOT want even hotter nuclear waste to go to "low-level" waste sites.

I DO WANT continued and increased surveillance of closed uranium mills.

I WANT more, not less, input on storage and transport cask designs.

I WANT more input, not less, on decommissioning plans and funding assurance requirements for reactors, uranium facilities and the proposed Consolidated "Interim" Storage facilities.

I DO NOT want NRC to improperly reclassify actions which actually cause significant environmental consequences to avoid environmental review.

I DO NOT want NRC to assume there are no impacts from the numerous exclusions listed in the advanced notice of proposed rulemaking.

This proposal violates the National Environmental Policy Act (NEPA).

NRC has not "provide(d) a reasoned explanation for the change(s)," and each of them deserves its own environmental impact statement, not an exemption.

DO NOT expand categorical exclusions. NRC should scrap this proposal and focus on reducing exclusions already allowed.

Sincerely,

Sincerely,

John Walton

Dear NRC Commissioner NRC Commissioners and Staff,

Dear NRC Commissioners and Staff:

I oppose NRC's proposed expansion of Categorical Exclusions (published 5-7-2021). It appears NRC wants to avoid legitimate controversy and generically exclude further public input on over a dozen important and controversial impacts from the nuclear power fuel chain. I do NOT want radioactive waste at any level released from nuclear control, to get into regular trash and commercial recycling, which could make everyday household items radioactive. This proposal could do that, despite decades of public opposition to "below regulatory concern" (BRC), "very low-level waste" (VLLW), and other generic exemptions from 10 CFR 20.2002 regulations.

I do NOT want even hotter nuclear waste to go to "low-level" waste sites.

I DO WANT continued and increased surveillance of closed uranium mills.

I WANT more, not less, input on storage and transport cask designs.

I WANT more input, not less, on decommissioning plans and funding assurance requirements for reactors, uranium facilities and the proposed Consolidated "Interim" Storage facilities.

I DO NOT want NRC to improperly reclassify actions which actually cause significant environmental consequences to avoid environmental review.

I DO NOT want NRC to assume there are no impacts from the numerous exclusions listed in the advanced notice of proposed rulemaking.

This proposal violates the National Environmental Policy Act (NEPA).

NRC has not "provide(d) a reasoned explanation for the change(s)," and each of them deserves its own environmental impact statement, not an exemption.

DO NOT expand categorical exclusions. NRC should scrap this proposal and focus on reducing exclusions already allowed.

This proposal could do that, despite decades of public opposition to "below regulatory concern" (BRC), "very low-level waste" (VLLW), and other generic exemptions from 10 CFR 20.2002 regulations.

I do NOT want even hotter nuclear waste to go to "low-level" waste sites.

I DO WANT continued and increased surveillance of closed uranium mills.

I WANT more, not less, input on storage and transport cask designs.

I WANT more input, not less, on decommissioning plans and funding assurance requirements for reactors, uranium facilities and the proposed Consolidated "Interim" Storage facilities.

I DO NOT want NRC to improperly reclassify actions which actually cause significant environmental consequences to avoid environmental review.

I DO NOT want NRC to assume there are no impacts from the numerous exclusions listed in the advanced notice of proposed rulemaking.

This proposal violates the National Environmental Policy Act (NEPA).

NRC has not "provide(d) a reasoned explanation for the change(s)," and each of them deserves its own environmental impact statement, not an exemption.

DO NOT expand categorical exclusions. NRC should scrap this proposal and focus on reducing exclusions already allowed.

Sincerely,

Sincerely,
Dr William M Smith Jr

Dear NRC Commissioner NRC Commissioners and Staff,

Dear NRC Commissioners and Staff:

I oppose NRC's proposed expansion of Categorical Exclusions (published 5-7-2021). It appears NRC wants to avoid legitimate controversy and generically exclude further public input on over a dozen important and controversial impacts from the nuclear power fuel chain. I do NOT want radioactive waste at any level released from nuclear control, to get into regular trash and commercial recycling, which could make everyday household items radioactive. This proposal could do that, despite decades of public opposition to "below regulatory concern" (BRC), "very low-level waste" (VLLW), and other generic exemptions from 10 CFR 20.2002 regulations.

I do NOT want even hotter nuclear waste to go to "low-level" waste sites.

I DO WANT continued and increased surveillance of closed uranium mills.

I WANT more, not less, input on storage and transport cask designs.

I DO WANT continued and increased surveillance of closed uranium mills.

I WANT more, not less, input on storage and transport cask designs.

I WANT more input, not less, on decommissioning plans and funding assurance requirements for reactors, uranium facilities and the proposed Consolidated "Interim" Storage facilities.

I DO NOT want NRC to improperly reclassify actions which actually cause significant environmental consequences to avoid environmental review.

I DO NOT want NRC to assume there are no impacts from the numerous exclusions listed in the advanced notice of proposed rulemaking.

This proposal violates the National Environmental Policy Act (NEPA).

NRC has not "provide(d) a reasoned explanation for the change(s)," and each of them deserves its own environmental impact statement, not an exemption.

DO NOT expand categorical exclusions. NRC should scrap this proposal and focus on reducing exclusions already allowed.

Sincerely,

Sincerely,

Jerry Charlson

Subject: [External_Sender] NRC 2018-0300 No to Expanding Categorical Exclusions
Date: Tuesday, July 20, 2021 2:38:37 PM

Dear NRC Commissioner NRC Commissioners and Staff,

Dear NRC Commissioners and Staff:

I oppose NRC's proposed expansion of Categorical Exclusions (published 5-7-2021). It appears NRC wants to avoid legitimate controversy and generically exclude further public input on over a dozen important and controversial impacts from the nuclear power fuel chain. I do NOT want radioactive waste at any level released from nuclear control, to get into regular trash and commercial recycling, which could make everyday household items radioactive. This proposal could do that, despite decades of public opposition to "below regulatory concern" (BRC), "very low-level waste" (VLLW), and other generic exemptions from 10 CFR 20.2002 regulations.

I do NOT want even hotter nuclear waste to go to "low-level" waste sites.

I DO WANT continued and increased surveillance of closed uranium mills.

I WANT more, not less, input on storage and transport cask designs.

I WANT more input, not less, on decommissioning plans and funding assurance requirements for reactors, uranium facilities and the proposed Consolidated "Interim" Storage facilities.

I DO NOT want NRC to improperly reclassify actions which actually cause significant environmental consequences to avoid environmental review.

I DO NOT want NRC to assume there are no impacts from the numerous exclusions listed in the advanced notice of proposed rulemaking.

Subject: [External_Sender] NRC 2018-0300 No to Expanding Categorical Exclusions
Date: Tuesday, July 20, 2021 2:40:10 PM

Dear NRC Commissioner NRC Commissioners and Staff,

Dear NRC Commissioners and Staff:

I oppose NRC's proposed expansion of Categorical Exclusions (published 5-7-2021). It appears NRC wants to avoid legitimate controversy and generically exclude further public input on over a dozen important and controversial impacts from the nuclear power fuel chain. I do NOT want radioactive waste at any level released from nuclear control, to get into regular trash and commercial recycling, which could make everyday household items radioactive. This proposal could do that, despite decades of public opposition to "below regulatory concern" (BRC), "very low-level waste" (VLLW), and other generic exemptions from 10 CFR 20.2002 regulations.

I do NOT want even hotter nuclear waste to go to "low-level" waste sites.

I DO WANT continued and increased surveillance of closed uranium mills.

I WANT more, not less, input on storage and transport cask designs.

I WANT more input, not less, on decommissioning plans and funding assurance requirements for reactors, uranium facilities and the proposed Consolidated "Interim" Storage facilities.

I DO NOT want NRC to improperly reclassify actions which actually cause significant environmental consequences to avoid environmental review.

I DO NOT want NRC to assume there are no impacts from the numerous exclusions listed in the advanced notice of proposed rulemaking.

This proposal violates the National Environmental Policy Act (NEPA).

NRC has not "provide(d) a reasoned explanation for the change(s)," and each of them deserves its own environmental impact statement, not an exemption.

DO NOT expand categorical exclusions. NRC should scrap this proposal and focus on reducing exclusions already allowed.

Subject: [External_Sender] NRC 2018-0300 No to Expanding Categorical Exclusions
Date: Tuesday, July 20, 2021 2:41:44 PM

Dear NRC Commissioner NRC Commissioners and Staff,

Dear NRC Commissioners and Staff:

I oppose NRC's proposed expansion of Categorical Exclusions (published 5-7-2021). It appears NRC wants to avoid legitimate controversy and generically exclude further public input on over a dozen important and controversial impacts from the nuclear power fuel chain. I do NOT want radioactive waste at any level released from nuclear control, to get into regular trash and commercial recycling, which could make everyday household items radioactive. This proposal could do that, despite decades of public opposition to "below regulatory concern" (BRC), "very low-level waste" (VLLW), and other generic exemptions from 10 CFR 20.2002 regulations.

I do NOT want even hotter nuclear waste to go to "low-level" waste sites.

I DO WANT continued and increased surveillance of closed uranium mills.

I WANT more, not less, input on storage and transport cask designs.

I WANT more input, not less, on decommissioning plans and funding assurance requirements for reactors, uranium facilities and the proposed Consolidated "Interim" Storage facilities.

I DO NOT want NRC to improperly reclassify actions which actually cause significant environmental consequences to avoid environmental review.

I DO NOT want NRC to assume there are no impacts from the numerous exclusions listed in the advanced notice of proposed rulemaking.

This proposal violates the National Environmental Policy Act (NEPA).

NRC has not "provide(d) a reasoned explanation for the change(s)," and each of them deserves its own environmental impact statement, not an exemption.

DO NOT expand categorical exclusions. NRC should scrap this proposal and focus on reducing exclusions already allowed.

Sincerely,

Sincerely,
Elisabeth Murawski

Dear NRC Commissioner NRC Commissioners and Staff,

Dear NRC Commissioners and Staff:

I oppose NRC's proposed expansion of Categorical Exclusions (published 5-7-2021). It appears NRC wants to avoid legitimate controversy and generically exclude further public input on over a dozen important and controversial impacts from the nuclear power fuel chain. I do NOT want radioactive waste at any level released from nuclear control, to get into regular trash and commercial recycling, which could make everyday household items radioactive. This proposal could do that, despite decades of public opposition to "below regulatory concern" (BRC), "very low-level waste" (VLLW), and other generic exemptions from 10 CFR 20.2002 regulations.

I do NOT want even hotter nuclear waste to go to "low-level" waste sites.

I DO WANT continued and increased surveillance of closed uranium mills.

I WANT more, not less, input on storage and transport cask designs.

I WANT more input, not less, on decommissioning plans and funding assurance requirements for reactors, uranium facilities and the proposed Consolidated "Interim" Storage facilities.

I DO NOT want NRC to improperly reclassify actions which actually cause significant environmental consequences to avoid environmental review.

I DO NOT want NRC to assume there are no impacts from the numerous exclusions listed in the advanced notice of proposed rulemaking.

This proposal violates the National Environmental Policy Act (NEPA).

NRC has not "provide(d) a reasoned explanation for the change(s)," and each of them deserves its own environmental impact statement, not an exemption.

DO NOT expand categorical exclusions. NRC should scrap this proposal and focus on reducing exclusions already allowed.

Sincerely,

Sincerely,
Colin Kay

I oppose NRC's proposed expansion of Categorical Exclusions (published 5-7-2021). It appears NRC wants to avoid legitimate controversy and generically exclude further public input on over a dozen important and controversial impacts from the nuclear power fuel chain. I do NOT want radioactive waste at any level released from nuclear control, to get into regular trash and commercial recycling, which could make everyday household items radioactive. This proposal could do that, despite decades of public opposition to "below regulatory concern" (BRC), "very low-level waste" (VLLW), and other generic exemptions from 10 CFR 20.2002 regulations.

I do NOT want even hotter nuclear waste to go to "low-level" waste sites.

I DO WANT continued and increased surveillance of closed uranium mills.

I WANT more, not less, input on storage and transport cask designs.

I WANT more input, not less, on decommissioning plans and funding assurance requirements for reactors, uranium facilities and the proposed Consolidated "Interim" Storage facilities.

I DO NOT want NRC to improperly reclassify actions which actually cause significant environmental consequences to avoid environmental review.

I DO NOT want NRC to assume there are no impacts from the numerous exclusions listed in the advanced notice of proposed rulemaking.

This proposal violates the National Environmental Policy Act (NEPA).

NRC has not "provide(d) a reasoned explanation for the change(s)," and each of them deserves its own environmental impact statement, not an exemption.

DO NOT expand categorical exclusions. NRC should scrap this proposal and focus on reducing exclusions already allowed.

Sincerely,

Sincerely,
Susan Wechsler

It appears NRC wants to avoid legitimate controversy and generically exclude further public input on over a dozen important and controversial impacts from the nuclear power fuel chain. I do NOT want radioactive waste at any level released from nuclear control, to get into regular trash and commercial recycling, which could make everyday household items radioactive. This proposal could do that, despite decades of public opposition to "below regulatory concern" (BRC), "very low-level waste" (VLLW), and other generic exemptions from 10 CFR 20.2002 regulations.

I do NOT want even hotter nuclear waste to go to "low-level" waste sites.

I DO WANT continued and increased surveillance of closed uranium mills.

I WANT more, not less, input on storage and transport cask designs.

I WANT more input, not less, on decommissioning plans and funding assurance requirements for reactors, uranium facilities and the proposed Consolidated "Interim" Storage facilities.

I DO NOT want NRC to improperly reclassify actions which actually cause significant environmental consequences to avoid environmental review.

I DO NOT want NRC to assume there are no impacts from the numerous exclusions listed in the advanced notice of proposed rulemaking.

This proposal violates the National Environmental Policy Act (NEPA).

NRC has not "provide(d) a reasoned explanation for the change(s)," and each of them deserves its own environmental impact statement, not an exemption.

DO NOT expand categorical exclusions. NRC should scrap this proposal and focus on reducing exclusions already allowed.

Sincerely,

Sincerely,
Marc Lionetti

I do NOT want radioactive waste at any level released from nuclear control, to get into regular trash and commercial recycling, which could make everyday household items radioactive. This proposal could do that, despite decades of public opposition to "below regulatory concern" (BRC), "very low-level waste" (VLLW), and other generic exemptions from 10 CFR 20.2002 regulations.

I do NOT want even hotter nuclear waste to go to "low-level" waste sites.

I DO WANT continued and increased surveillance of closed uranium mills.

I WANT more, not less, input on storage and transport cask designs.

I WANT more input, not less, on decommissioning plans and funding assurance requirements for reactors, uranium facilities and the proposed Consolidated "Interim" Storage facilities.

I DO NOT want NRC to improperly reclassify actions which actually cause significant environmental consequences to avoid environmental review.

I DO NOT want NRC to assume there are no impacts from the numerous exclusions listed in the advanced notice of proposed rulemaking.

This proposal violates the National Environmental Policy Act (NEPA).

NRC has not "provide(d) a reasoned explanation for the change(s)," and each of them deserves its own environmental impact statement, not an exemption.

DO NOT expand categorical exclusions. NRC should scrap this proposal and focus on reducing exclusions already allowed.

Sincerely,

Sincerely,

Theodore C. Snyder

Dear NRC Commissioner NRC Commissioners and Staff,

Dear NRC Commissioners and Staff:

I oppose NRC's proposed expansion of Categorical Exclusions (published 5-7-2021). It appears NRC wants to avoid legitimate controversy and generically exclude further public input on over a dozen important and controversial impacts from the nuclear power fuel chain. I do NOT want radioactive waste at any level released from nuclear control, to get into regular trash and commercial recycling, which could make everyday household items radioactive. This proposal could do that, despite decades of public opposition to "below regulatory concern" (BRC), "very low-level waste" (VLLW), and other generic exemptions from 10 CFR 20.2002 regulations.

I do NOT want even hotter nuclear waste to go to "low-level" waste sites.

I DO WANT continued and increased surveillance of closed uranium mills.

I WANT more, not less, input on storage and transport cask designs.

This proposal could do that, despite decades of public opposition to "below regulatory concern" (BRC), "very low-level waste" (VLLW), and other generic exemptions from 10 CFR 20.2002 regulations.

I do NOT want even hotter nuclear waste to go to "low-level" waste sites.

I DO WANT continued and increased surveillance of closed uranium mills.

I WANT more, not less, input on storage and transport cask designs.

I WANT more input, not less, on decommissioning plans and funding assurance requirements for reactors, uranium facilities and the proposed Consolidated "Interim" Storage facilities.

I DO NOT want NRC to improperly reclassify actions which actually cause significant environmental consequences to avoid environmental review.

I DO NOT want NRC to assume there are no impacts from the numerous exclusions listed in the advanced notice of proposed rulemaking.

This proposal violates the National Environmental Policy Act (NEPA).

NRC has not "provide(d) a reasoned explanation for the change(s)," and each of them deserves its own environmental impact statement, not an exemption.

DO NOT expand categorical exclusions. NRC should scrap this proposal and focus on reducing exclusions already allowed.

Sincerely,

Sincerely,

Judy Irving

Dear NRC Commissioner NRC Commissioners and Staff,

Dear NRC Commissioners and Staff:

I oppose NRC's proposed expansion of Categorical Exclusions (published 5-7-2021). It appears NRC wants to avoid legitimate controversy and generically exclude further public input on over a dozen important and controversial impacts from the nuclear power fuel chain. I do NOT want radioactive waste at any level released from nuclear control, to get into regular trash and commercial recycling, which could make everyday household items radioactive. This proposal could do that, despite decades of public opposition to "below regulatory concern" (BRC), "very low-level waste" (VLLW), and other generic exemptions from 10 CFR 20.2002 regulations.

I do NOT want even hotter nuclear waste to go to "low-level" waste sites.

I DO WANT continued and increased surveillance of closed uranium mills.

I WANT more, not less, input on storage and transport cask designs.

I WANT more input, not less, on decommissioning plans and funding assurance requirements for reactors, uranium facilities and the proposed Consolidated "Interim" Storage facilities.

Subject: [External_Sender] NRC 2018-0300 No to Expanding Categorical Exclusions
Date: Tuesday, July 20, 2021 2:50:51 PM

Dear NRC Commissioner NRC Commissioners and Staff,

Dear NRC Commissioners and Staff:

I oppose NRC's proposed expansion of Categorical Exclusions (published 5-7-2021). It appears NRC wants to avoid legitimate controversy and generically exclude further public input on over a dozen important and controversial impacts from the nuclear power fuel chain. I do NOT want radioactive waste at any level released from nuclear control, to get into regular trash and commercial recycling, which could make everyday household items radioactive. This proposal could do that, despite decades of public opposition to "below regulatory concern" (BRC), "very low-level waste" (VLLW), and other generic exemptions from 10 CFR 20.2002 regulations.

I do NOT want even hotter nuclear waste to go to "low-level" waste sites.

I DO WANT continued and increased surveillance of closed uranium mills.

I WANT more, not less, input on storage and transport cask designs.

I WANT more input, not less, on decommissioning plans and funding assurance requirements for reactors, uranium facilities and the proposed Consolidated "Interim" Storage facilities.

I DO NOT want NRC to improperly reclassify actions which actually cause significant environmental consequences to avoid environmental review.

I DO NOT want NRC to assume there are no impacts from the numerous exclusions listed in the advanced notice of proposed rulemaking.

Dear NRC Commissioner NRC Commissioners and Staff,

Dear NRC Commissioners and Staff:

I oppose NRC's proposed expansion of Categorical Exclusions (published 5-7-2021). It appears NRC wants to avoid legitimate controversy and generically exclude further public input on over a dozen important and controversial impacts from the nuclear power fuel chain. This increases the risk of radioactive waste at any level released from nuclear control, to get into regular trash and commercial recycling, which could make everyday household items radioactive. This proposal could do that, despite decades of public opposition to "below regulatory concern" (BRC), "very low-level waste" (VLLW), and other generic exemptions from 10 CFR 20.2002 regulations.

We should not have even hotter nuclear waste to go to "low-level" waste sites.

We need continued and increased surveillance of closed uranium mills.

We need more, not less, input on storage and transport cask designs.

We need more input, not less, on decommissioning plans and funding assurance requirements for reactors, uranium facilities and the proposed Consolidated "Interim" Storage facilities.

NRC should not improperly reclassify actions which actually cause significant environmental consequences to avoid environmental review.

NRC should not assume there are no impacts from the numerous exclusions listed in the advanced notice of proposed rulemaking.

Subject: [External_Sender] NRC 2018-0300 No to Expanding Categorical Exclusions
Date: Tuesday, July 20, 2021 2:52:29 PM

Dear NRC Commissioner NRC Commissioners and Staff,

Dear NRC Commissioners and Staff:

I oppose NRC's proposed expansion of Categorical Exclusions (published 5-7-2021). It appears NRC wants to avoid legitimate controversy and generically exclude further public input on over a dozen important and controversial impacts from the nuclear power fuel chain. I do NOT want radioactive waste at any level released from nuclear control, to get into regular trash and commercial recycling, which could make everyday household items radioactive. This proposal could do that, despite decades of public opposition to "below regulatory concern" (BRC), "very low-level waste" (VLLW), and other generic exemptions from 10 CFR 20.2002 regulations.

I do NOT want even hotter nuclear waste to go to "low-level" waste sites.

I DO WANT continued and increased surveillance of closed uranium mills.

I WANT more, not less, input on storage and transport cask designs.

I WANT more input, not less, on decommissioning plans and funding assurance requirements for reactors, uranium facilities and the proposed Consolidated "Interim" Storage facilities.

I DO NOT want NRC to improperly reclassify actions which actually cause significant environmental consequences to avoid environmental review.

I DO NOT want NRC to assume there are no impacts from the numerous exclusions listed in the advanced notice of proposed rulemaking.

This proposal violates the National Environmental Policy Act (NEPA).

NRC has not "provide(d) a reasoned explanation for the change(s)," and each of them deserves its own environmental impact statement, not an exemption.

DO NOT expand categorical exclusions. NRC should scrap this proposal and focus on reducing exclusions already allowed.

Subject: [External_Sender] NRC 2018-0300 No to Expanding Categorical Exclusions
Date: Tuesday, July 20, 2021 2:54:16 PM

Dear NRC Commissioner NRC Commissioners and Staff,

Dear NRC Commissioners and Staff:

I oppose NRC's proposed expansion of Categorical Exclusions (published 5-7-2021). It appears NRC wants to avoid legitimate controversy and generically exclude further public input on over a dozen important and controversial impacts from the nuclear power fuel chain. I do NOT want radioactive waste at any level released from nuclear control, to get into regular trash and commercial recycling, which could make everyday household items radioactive. This proposal could do that, despite decades of public opposition to "below regulatory concern" (BRC), "very low-level waste" (VLLW), and other generic exemptions from 10 CFR 20.2002 regulations.

I do NOT want even hotter nuclear waste to go to "low-level" waste sites.

I DO WANT continued and increased surveillance of closed uranium mills.

I WANT more, not less, input on storage and transport cask designs.

I WANT more input, not less, on decommissioning plans and funding assurance requirements for reactors, uranium facilities and the proposed Consolidated "Interim" Storage facilities.

I DO NOT want NRC to improperly reclassify actions which actually cause significant environmental consequences to avoid environmental review.

I DO NOT want NRC to assume there are no impacts from the numerous exclusions listed in the advanced notice of proposed rulemaking.

This proposal violates the National Environmental Policy Act (NEPA).

NRC has not "provide(d) a reasoned explanation for the change(s)," and each of them deserves its own environmental impact statement, not an exemption.

DO NOT expand categorical exclusions. NRC should scrap this proposal and focus on reducing exclusions already allowed.

Sincerely,

Sincerely,
Gracie Partida

Dear NRC Commissioner NRC Commissioners and Staff,

Dear NRC Commissioners and Staff:

I oppose NRC's proposed expansion of Categorical Exclusions (published 5-7-2021). It appears NRC wants to avoid legitimate controversy and generically exclude further public input on over a dozen important and controversial impacts from the nuclear power fuel chain. I do NOT want radioactive waste at any level released from nuclear control, to get into regular trash and commercial recycling, which could make everyday household items radioactive. This proposal could do that, despite decades of public opposition to "below regulatory concern" (BRC), "very low-level waste" (VLLW), and other generic exemptions from 10 CFR 20.2002 regulations.

I do NOT want even hotter nuclear waste to go to "low-level" waste sites.

I DO WANT continued and increased surveillance of closed uranium mills.

I WANT more, not less, input on storage and transport cask designs.

I WANT more input, not less, on decommissioning plans and funding assurance requirements for reactors, uranium facilities and the proposed Consolidated "Interim" Storage facilities.

I DO NOT want NRC to improperly reclassify actions which actually cause significant environmental consequences to avoid environmental review.

I DO NOT want NRC to assume there are no impacts from the numerous exclusions listed in the advanced notice of proposed rulemaking.

This proposal violates the National Environmental Policy Act (NEPA).

NRC has not "provide(d) a reasoned explanation for the change(s)," and each of them deserves its own environmental impact statement, not an exemption.

DO NOT expand categorical exclusions. NRC should scrap this proposal and focus on reducing exclusions already allowed.

Sincerely,

Sincerely,

Joseph Lawson

It appears NRC wants to avoid legitimate controversy and generically exclude further public input on over a dozen important and controversial impacts from the nuclear power fuel chain. I do NOT want radioactive waste at any level released from nuclear control, to get into regular trash and commercial recycling, which could make everyday household items radioactive. This proposal could do that, despite decades of public opposition to "below regulatory concern" (BRC), "very low-level waste" (VLLW), and other generic exemptions from 10 CFR 20.2002 regulations.

I do NOT want even hotter nuclear waste to go to "low-level" waste sites.

I DO WANT continued and increased surveillance of closed uranium mills.

I WANT more, not less, input on storage and transport cask designs.

I WANT more input, not less, on decommissioning plans and funding assurance requirements for reactors, uranium facilities and the proposed Consolidated "Interim" Storage facilities.

I DO NOT want NRC to improperly reclassify actions which actually cause significant environmental consequences to avoid environmental review.

I DO NOT want NRC to assume there are no impacts from the numerous exclusions listed in the advanced notice of proposed rulemaking.

This proposal violates the National Environmental Policy Act (NEPA).

NRC has not "provide(d) a reasoned explanation for the change(s)," and each of them deserves its own environmental impact statement, not an exemption.

DO NOT expand categorical exclusions. NRC should scrap this proposal and focus on reducing exclusions already allowed.

Sincerely,

Sincerely,
jennifer valentine

It appears NRC wants to avoid legitimate controversy and generically exclude further public input on over a dozen important and controversial impacts from the nuclear power fuel chain. I do NOT want radioactive waste at any level released from nuclear control, to get into regular trash and commercial recycling, which could make everyday household items radioactive. This proposal could do that, despite decades of public opposition to "below regulatory concern" (BRC), "very low-level waste" (VLLW), and other generic exemptions from 10 CFR 20.2002 regulations.

I do NOT want even hotter nuclear waste to go to "low-level" waste sites.

I DO WANT continued and increased surveillance of closed uranium mills.

I WANT more, not less, input on storage and transport cask designs.

I WANT more input, not less, on decommissioning plans and funding assurance requirements for reactors, uranium facilities and the proposed Consolidated "Interim" Storage facilities.

I DO NOT want NRC to improperly reclassify actions which actually cause significant environmental consequences to avoid environmental review.

I DO NOT want NRC to assume there are no impacts from the numerous exclusions listed in the advanced notice of proposed rulemaking.

This proposal violates the National Environmental Policy Act (NEPA).

NRC has not "provide(d) a reasoned explanation for the change(s)," and each of them deserves its own environmental impact statement, not an exemption.

DO NOT expand categorical exclusions. NRC should scrap this proposal and focus on reducing exclusions already allowed.

Sincerely,

Sincerely,
Karen Kirschling

I do NOT want radioactive waste at any level released from nuclear control, to get into regular trash and commercial recycling, which could make everyday household items radioactive. This proposal could do that, despite decades of public opposition to "below regulatory concern" (BRC), "very low-level waste" (VLLW), and other generic exemptions from 10 CFR 20.2002 regulations.

I do NOT want even hotter nuclear waste to go to "low-level" waste sites.

I DO WANT continued and increased surveillance of closed uranium mills.

I WANT more, not less, input on storage and transport cask designs.

I WANT more input, not less, on decommissioning plans and funding assurance requirements for reactors, uranium facilities and the proposed Consolidated "Interim" Storage facilities.

I DO NOT want NRC to improperly reclassify actions which actually cause significant environmental consequences to avoid environmental review.

I DO NOT want NRC to assume there are no impacts from the numerous exclusions listed in the advanced notice of proposed rulemaking.

This proposal violates the National Environmental Policy Act (NEPA).

NRC has not "provide(d) a reasoned explanation for the change(s)," and each of them deserves its own environmental impact statement, not an exemption.

DO NOT expand categorical exclusions. NRC should scrap this proposal and focus on reducing exclusions already allowed.

Sincerely,

Sincerely,

Glenn Gardiner

Dear NRC Commissioner NRC Commissioners and Staff,

Dear NRC Commissioners and Staff:

I oppose NRC's proposed expansion of Categorical Exclusions (published 5-7-2021). It appears NRC wants to avoid legitimate controversy and generically exclude further public input on over a dozen important and controversial impacts from the nuclear power fuel chain. I do NOT want radioactive waste at any level released from nuclear control, to get into regular trash and commercial recycling, which could make everyday household items radioactive. This proposal could do that, despite decades of public opposition to "below regulatory concern" (BRC), "very low-level waste" (VLLW), and other generic exemptions from 10 CFR 20.2002 regulations.

I do NOT want even hotter nuclear waste to go to "low-level" waste sites.

It appears NRC wants to avoid legitimate controversy and generically exclude further public input on over a dozen important and controversial impacts from the nuclear power fuel chain. I do NOT want radioactive waste at any level released from nuclear control, to get into regular trash and commercial recycling, which could make everyday household items radioactive. This proposal could do that, despite decades of public opposition to "below regulatory concern" (BRC), "very low-level waste" (VLLW), and other generic exemptions from 10 CFR 20.2002 regulations.

I do NOT want even hotter nuclear waste to go to "low-level" waste sites.

I DO WANT continued and increased surveillance of closed uranium mills.

I WANT more, not less, input on storage and transport cask designs.

I WANT more input, not less, on decommissioning plans and funding assurance requirements for reactors, uranium facilities and the proposed Consolidated "Interim" Storage facilities.

I DO NOT want NRC to improperly reclassify actions which actually cause significant environmental consequences to avoid environmental review.

I DO NOT want NRC to assume there are no impacts from the numerous exclusions listed in the advanced notice of proposed rulemaking.

This proposal violates the National Environmental Policy Act (NEPA).

NRC has not "provide(d) a reasoned explanation for the change(s)," and each of them deserves its own environmental impact statement, not an exemption.

DO NOT expand categorical exclusions. NRC should scrap this proposal and focus on reducing exclusions already allowed.

Sincerely,

Sincerely,

Joyce Shiffrin

I do NOT want even hotter nuclear waste to go to "low-level" waste sites.

I DO WANT continued and increased surveillance of closed uranium mills.

I WANT more, not less, input on storage and transport cask designs.

I WANT more input, not less, on decommissioning plans and funding assurance requirements for reactors, uranium facilities and the proposed Consolidated "Interim" Storage facilities.

I DO NOT want NRC to improperly reclassify actions which actually cause significant environmental consequences to avoid environmental review.

I DO NOT want NRC to assume there are no impacts from the numerous exclusions listed in the advanced notice of proposed rulemaking.

This proposal violates the National Environmental Policy Act (NEPA).

NRC has not "provide(d) a reasoned explanation for the change(s)," and each of them deserves its own environmental impact statement, not an exemption.

DO NOT expand categorical exclusions. NRC should scrap this proposal and focus on reducing exclusions already allowed.

Sincerely,

Sincerely,
George Lewis

Subject: [External_Sender] NRC 2018-0300 No to Expanding Categorical Exclusions
Date: Tuesday, July 20, 2021 3:09:58 PM

Dear NRC Commissioner NRC Commissioners and Staff,

Dear NRC Commissioners and Staff:

I oppose NRC's proposed expansion of Categorical Exclusions (published 5-7-2021). It appears NRC wants to avoid legitimate controversy and generically exclude further public input on over a dozen important and controversial impacts from the nuclear power fuel chain. I do NOT want radioactive waste at any level released from nuclear control, to get into regular trash and commercial recycling, which could make everyday household items radioactive. This proposal could do that, despite decades of public opposition to "below regulatory concern" (BRC), "very low-level waste" (VLLW), and other generic exemptions from 10 CFR 20.2002 regulations.

I do NOT want even hotter nuclear waste to go to "low-level" waste sites.

I DO WANT continued and increased surveillance of closed uranium mills.

I WANT more, not less, input on storage and transport cask designs.

I WANT more input, not less, on decommissioning plans and funding assurance requirements for reactors, uranium facilities and the proposed Consolidated "Interim" Storage facilities.

I DO NOT want NRC to improperly reclassify actions which actually cause significant environmental consequences to avoid environmental review.

I DO NOT want NRC to assume there are no impacts from the numerous exclusions listed in the advanced notice of proposed rulemaking.

This proposal violates the National Environmental Policy Act (NEPA).

NRC has not "provide(d) a reasoned explanation for the change(s)," and each of them deserves its own environmental impact statement, not an exemption.

DO NOT expand categorical exclusions. NRC should scrap this proposal and focus on reducing exclusions already allowed.

I WANT more, not less, input on storage and transport cask designs.

I WANT more input, not less, on decommissioning plans and funding assurance requirements for reactors, uranium facilities and the proposed Consolidated "Interim" Storage facilities.

I DO NOT want NRC to improperly reclassify actions which actually cause significant environmental consequences to avoid environmental review.

I DO NOT want NRC to assume there are no impacts from the numerous exclusions listed in the advanced notice of proposed rulemaking.

This proposal violates the National Environmental Policy Act (NEPA).

NRC has not "provide(d) a reasoned explanation for the change(s)," and each of them deserves its own environmental impact statement, not an exemption.

DO NOT expand categorical exclusions. NRC should scrap this proposal and focus on reducing exclusions already allowed.

Sincerely,

Sincerely,
Tima Daly

Subject: [External_Sender] NRC 2018-0300 No to Expanding Categorical Exclusions
Date: Tuesday, July 20, 2021 3:13:20 PM

Dear NRC Commissioner NRC Commissioners and Staff,

Dear NRC Commissioners and Staff:

I oppose NRC's proposed expansion of Categorical Exclusions (published 5-7-2021). It appears NRC wants to avoid legitimate controversy and generically exclude further public input on over a dozen important and controversial impacts from the nuclear power fuel chain. I do NOT want radioactive waste at any level released from nuclear control, to get into regular trash and commercial recycling, which could make everyday household items radioactive. This proposal could do that, despite decades of public opposition to "below regulatory concern" (BRC), "very low-level waste" (VLLW), and other generic exemptions from 10 CFR 20.2002 regulations.

I do NOT want even hotter nuclear waste to go to "low-level" waste sites.

I DO WANT continued and increased surveillance of closed uranium mills.

I WANT more, not less, input on storage and transport cask designs.

I WANT more input, not less, on decommissioning plans and funding assurance requirements for reactors, uranium facilities and the proposed Consolidated "Interim" Storage facilities.

I DO NOT want NRC to improperly reclassify actions which actually cause significant environmental consequences to avoid environmental review.

I DO NOT want NRC to assume there are no impacts from the numerous exclusions listed in the advanced notice of proposed rulemaking.
