Exemption Request for Senior Reactor Operator License Application

Reference: Letter from John A. Krakuszeski (Duke Energy) to Laura Dudes (U.S. Nuclear Regulatory Commission, Region II), *Application for Senior Reactor Operator License*, Duke Energy Serial Number RA-21-0229, dated July 29, 2021

Ladies and Gentlemen:

Duke Energy Progress, LLC (Duke Energy), submitted an application, in accordance with 10 CFR 55.31, for an individual to be licensed as a senior reactor operator (SRO) at the Brunswick Steam Electric Plant (BSEP), Unit Nos. 1 and 2 (i.e., Reference). This applicant was previously licensed at BSEP. As a result, in accordance with 10 CFR 55.47, "Waiver of examination and test requirements," Duke Energy requested a waiver of the written examination and operating test requirements.

It has been approximately 2.1 years since this individual was licensed at BSEP. Therefore, in support of the referenced SRO license application submittal, and in accordance with 10 CFR 55.11, "Specific exemptions," Duke Energy requests an exemption from the two-year eligibility requirement of 10 CFR 55.47(a)(1), which requires extensive actual operating experience within two years before the date of an application for a waiver of the written examination and operating test requirements. The enclosure to this letter provides the basis for the requested exemption from the two-year eligibility requirement of 10 CFR 55.47(a)(1) for this SRO license application.

The enclosure contains personal information. Duke Energy requests that the information contained the enclosure be withheld from public disclosure, in accordance with 10 CFR 2.390(a)(6), since disclosure of this information would constitute a clearly unwarranted invasion of personal privacy.
