SUBJECT: POINT BEACH NUCLEAR PLANT, UNITS 1 AND 2, SUBSEQUENT LICENSE
RENEWAL APPLICATION – SUMMARY OF JUNE 30, 2021, PUBLIC MEETING
ON PROPOSED AGING MANAGEMENT OF REACTOR VESSEL INTERNALS

Dear Mr. Coffey:

By letter dated November 16, 2020 (Agencywide Documents Access and Management System (ADAMS) Package Accession No. ML20329A292), NextEra Energy Point Beach, LLC (NextEra) submitted an application for subsequent renewal of Renewed Facility Operating License Nos. DPR-24 and DPR-27 for Point Beach Nuclear Plant, Units 1 and 2 (Point Beach), respectively, to the U.S. Nuclear Regulatory Commission (NRC).

On June 30, 2021, the NRC staff held a public meeting with NextEra to discuss the content of the Point Beach Subsequent License Renewal Application. The staff began with the public meeting logistics including the agenda. The discussion, which followed, provided the staff and NextEra and opportunity to discuss the supplement submitted by the applicant to the NRC on July 26, 2021 (ADAMS Accession No. ML21147A115). The supplement documented the applicant's proposed aging management of reactor vessel internals, modified to be in accordance with the guidance contained in SLR-ISG-2021-01-PWRVI, "Updated Aging Management Criteria for Reactor Vessel Internal Components for Pressurized-Water Reactors," (ADAMS Accession No. ML20217L203).

There were no questions made by members of the public to the NRC staff during the public question and answer portion of the meeting.

B. Coffey
