Subject: request to amend the NRC license - additional information needed
Date: Monday, August 2, 2021 2:00:00 PM

Mr. Gagnon,

We are reviewing the request dated June 24, 2021 to amend the license naming a new RSO and new authorized users.

1. In support of your request to serve as RSO, please provide your training or education, and your experience in handling the types and quantities of radioactive materials authorized on the license. It appears that most of your experience was with gamma emitters.
2. For each persons requested to be added as authorized users, in accordance with NUREG-1556, Volume 7 [<https://www.nrc.gov/reading-rm/doc-collections/nuregs/staff/sr1556/v7/index.html>], provide the following information to demonstrate that the proposed persons are qualified by training and experience to use licensed materials:
 - a. Name of the person and the radionuclides and quantities to be used;
 - b. The formal training or education in radiation safety topic [including the topics covered, the duration of the training, when the training was received and the identity and location of the training provider.]
 - c. The experience using licensed materials (types, forms, quantities handled; activities performed; duration of experience).

Please respond by letter within 30 days. A pdf of a signed letter may be submitted by email directly to me. If you have any questions, please contact me.

Thanks,
Betsy
