Thank you for the opportunity to comment.

Due to the dangers posed by producing nuclear power and waste disposal an updated and thorough policy and procedure must be developed prior to expending resources to start production. And plans must ensure that those areas of the country or factions of society that benefit must invest proportionally in the cost and disposal, including proximity of their homes to the production and disposal sites.

The production of nuclear weapons for deterrence is not justice for humanity. No nuclear waste from the production of weapons is acceptable. Invest in and use diplomacy to maintain balance in world affairs.
