Hi Laura,

I wasn't sure what to do there, you can ;leave the current mailing address as it is. I guess I was just trying to make sure that you guys were aware that the gauges we have here in Springfield, we would be storing at that new location.

Let's leave the overall mailing address as is please.

Thanks you!

Patrick Tasset

Subject: Additional Inquiry - Pending NRC License Amendment Request

Hello Patrick,

I have one additional question regarding your pending license amendment request.

In the submitted letter you request that the mailing address for the Springfield office be changed to the new requested location. Does the overall mailing address also need to be updated on the license? The current mailing address is 1700 E. 123rd St., Olathe, Kansas 66061. In the short term I will be sending the amended license to you through email due to our current Covid remote work protocols, but in the future we may resume mailing physical copies of licensing documents.

**Thanks,
Laura**
