RE: FOIA Request—ISR or ISL License Applications Denied Since 2011

August 12, 2021

Dear Sir or Madam:

Pursuant to the Freedom of Information Act, 5 U.S.C. § 552, *et. seq.*, please consider the following request for information. I request copies of all documents including, but not limited to, correspondence, memoranda, telephone logs, emails, studies, and meeting notes from January 1, 2011 until the present, regarding: materials or byproduct license applications the NRC has denied for ISL (in situ leach) or ISR (in situ recovery) mines.

I would like to request a waiver of all fees for this request. My affiliation is with a non-profit public interest organization that will use this information for furthering public, non-commercial interests. The disclosure of this information will contribute significantly to the understanding of ISL uranium mine licensing. This information will help inform the public of how the NRC may evaluate future applications. Because any information provided by the U.S. NRC will be used to educate and inform the general public, there is no commercial interest in the information.

Thank you for your attention to this matter, and please do not hesitate to contact me if you have any questions or need additional information.

Sincerely,  
  
/s/  
Kendra Palmer  
Paralegal
