To Whom it May Concern:

We have reviewed the Indian Point Nuclear Generating Units 1, 2 and 3 Post Shutdown Decommissioning Activities Report dated December 19, 2019 and offer the following comments. Holtec Decommissioning International must:

1. Remove the seven Private Aids to Navigation marking the USCG Safety and Security Zone codified at 33 CFR 165.169(a)(1) once the Hudson River water intake is no longer necessary. The USCG will then disestablish this safety and security zone through the Federal rulemaking process.
2. Contact USCG Hazardous Materials Division (CG-ENG-5) for current radioactive materials transportation compliance requirements, including, but not limited to:
  - a. NAVIGATION AND VESSEL INSPECTION CIRCULAR NO. 3-94, IMO Code for the Safe Carriage of Irradiated Nuclear Fuel, Plutonium and High-Level Radioactive Wastes in Flasks on Board Ships (IMO Resolution A.748(18)), and
  - b. NAVIGATION AND VESSEL INSPECTION CIRCULAR NO. 2-87, Domestic Barge Transportation of Radioactive Materials/Nuclear Waste.

The following contact information is provided:

Commandant (CG-ENG-5)  
U.S. Coast Guard Headquarters  
2703 Martin Luther King Jr. Ave SE Stop 7509  
Washington DC 20593-7509  
Email: [hazmatstandards@uscg.mil](mailto:hazmatstandards@uscg.mil)

3. Contact the Sector New York, Chief, Inspections Department at CDR [Eustacia.Y.Weist@uscg.mil](mailto:Eustacia.Y.Weist@uscg.mil) or (718) 354-4222 for any USCG barge shipment compliance requirements including, but not limited to: 46 CFR PART 148 CARRIAGE OF BULK SOLID MATERIALS THAT REQUIRE SPECIAL HANDLING and 49 CFR PART 173 SHIPPERS – GENERAL REQUIREMENTS FOR SHIPMENTS AND PACKAGINGS.

If you have any questions or comments regarding this matter, please contact Mr. Jeff Yunker at (718) 354-4195.

Sincerely,

A handwritten signature in cursive script that reads "John M. Singletary".
