

**UNITED STATES
NUCLEAR REGULATORY COMMISSION**

REGION III
2443 WARRENVILLE RD. SUITE 210
LISLE, IL 60532-4352

September 17, 2021

Christopher Onolemhemen, P.E.
Manager of Testing Program / Radiation Safety Officer
Wayne County Department of Public Services
33809 Michigan Ave.
Wayne, MI 48184

SUBJECT: RENEWAL OF RADIOACTIVE MATERIALS LICENSE FOR WAYNE COUNTY
DEPARTMENT OF PUBLIC SERVICES, NRC LICENSE NO. 21-13687-01

Dear Mr. Onolemhemen:

Enclosed is Amendment No. 22 renewing your U.S. Nuclear Regulatory Commission (NRC) Materials License No. 21-13687-01, in accordance with your application dated April 12, 2021 and e-mail correspondence dated August 24, 2021.

Your license has been renewed through September 30, 2036. In addition, the license was amended to:

- Identify your appointment as Radiation Safety Officer; and
- Remove authorization for the Troxler Electronic Laboratories, Inc., Model 2401 portable gauging device.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. NRC Region III office at (630) 829-9887 so that we may provide appropriate corrections and answers.

An environmental assessment for this action is not required because this action is categorically excluded under Title 10 of the *Code of Federal Regulations* (CFR) Section 51.22(c).

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation; or imposition of a civil penalty; or an Order suspending, modifying, or revoking your license as specified in the NRC Enforcement Policy. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance that NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy

statement and supporting material that may benefit your organization on NRC's safety culture Web site at <https://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice and Procedure," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's ADAMS, accessible from the NRC Web site at <https://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

Jason M. Kelly, MPH
Health Physicist
Materials Licensing Branch
