Subject: [External_Sender] Rulmaking Petition for Honeywell Metropolis
Date: Friday, September 17, 2021 4:06:18 PM

Greetings,

I am submitting a rulemaking petition for the Honeywell Metropolis-Works plant located in Metropolis, Illinois.

I have seen photographs that show the drum and cylinder yards. These yards are not in any type of protective enclosure, and are certainly exposed to the elements of which may cause corrosion and movement.

I propose all drum and cylinder yards become enclosed; each in a protective enclosure to ensure less/no damage from rain, storms, tornados, etc.

This would ensure the citizens of Metropolis, Illinois and the surrounding area are much more protected from these type of occurrences.

Truth + Unity = Triumph

God Bless
