Subject: [External_Sender] DG 4030

Good Morning,

Ray Schiele from TVA CRN licensing. The team here has reviewed the DG 4030 and we have provided a comment to DG 4030 for your consideration. Any questions feel free to contact me at your convenience.

Ray Schiele

This Draft RG does not mention the short-term dispersion estimates for an environmental report. NUREG-1555 and RG 4.2 address the 50th percentile X/Qs for the design basis accident evaluation in an environmental report. This guidance should address ARCON as an acceptable methodology for calculation of 50th percentile atmospheric dispersion factors for an environmental report.
