Subject: [External_Sender] Re: Review of Draft Environmental Assessment for Westinghouse Columbia alternative disposal request (Please expedite)
Date: Thursday, September 30, 2021 3:22:14 PM

David,

The Department has reviewed the draft Environmental Assessment and does not have any comments. Thank you for the opportunity to review it.

Gary

Subject: Review of Draft Environmental Assessment for Westinghouse Columbia alternative disposal request (Please expedite)

Importance: High

I am enclosing the draft Environmental Assessment related to an alternative disposal request from the Westinghouse Columbia Fuel Fabrication Facility. The request relates to removal of calcium fluoride waste material (contaminated with special nuclear material) from the calcium fluoride pile for disposal at the US Ecology facility in Idaho. Westinghouse has requested approval by early October in order to reduce impacts on their cleanup program.

We would appreciate if you could perform an expedited review of the document and let me know if you have any comments. If possible, I would like to receive your comments (or indication that you don't have any comments) by October 1 (Friday) so that we can meet the deadline. The document is considered to be draft -pre-decisional information.

If you have any questions, please feel free to contact me by email at David.tiktinsky@nrc.gov or by phone at 301-415-8740.

Thanks for your assistance.
