October 19, 2021

Mr. David Rhoades
Senior VP, Exelon Generation Company, LLC
President and CNO, Exelon Nuclear
4300 Winfield Road
Warrenville, IL 60555

SUBJECT: LASALLE COUNTY STATION, UNIT 1 - INFORMATION REQUEST FOR
A NRC POST-APPROVAL SITE INSPECTION FOR LICENSE RENEWAL
05000373/2022010

Dear Mr. Rhoades:

On January 10, 2022, the U.S. Nuclear Regulatory Commission (NRC) will begin a Post-Approval Site Inspection for License Renewal at Lasalle County Station, Unit 1. This inspection will be performed in accordance with NRC Inspection Procedure (IP) 71003. This inspection will focus on verifying that license conditions added as part of your renewed license and a sample of license renewal commitments have been implemented.

In order to minimize the inspection impact on the site and to ensure a productive inspection for both parties, we have enclosed a request for information needed for the inspection. It is important that all of these documents are up to date and complete in order to minimize the number of additional documents requested during the preparation and/or the on-site portions of the inspection. Insofar as possible, this information should be provided electronically to the lead inspector. The information request has been divided into two groups:

- The first group lists information necessary for our initial inspection scoping and in-office preparation activities. During the in-office preparation activities, the team will identify as much as possible the information and activities to be reviewed during the inspection. This information should be provided to the lead inspector by December 27, 2021.
- The second group includes the additional information required for the team to review selected activities. This information should be available to the team onsite January 10, 2022. It is also requested that corrective action documents and/or questions developed during the inspection be provided to the lead inspector as the documents are generated.

The lead inspector for this inspection is Mr. J. Bozga. We understand that our licensing contact for this inspection is Mr. J. Greenblott of your organization. If there are any questions about the inspection or the material requested in the enclosure, please contact the lead inspector at 630-829-9613.

This letter does not contain new or amended information collection requirements subject to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.). Existing information collection requirements were approved by the Office of Management and Budget Control Number 3150-0011. The NRC may not conduct or sponsor, and a person is not required to respond to, a request for information or an information collection requirement unless the requesting document displays a currently valid Office of Management and Budget Control Number.

In accordance with Title 10, *Code of Federal Regulations* (CFR), Section 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records System (PARS) component of NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

Sincerely,

Signed by Bozga, John
on 10/19/21

John V. Bozga, Senior Reactor Inspector
Engineering Branch 1
Division of Reactor Safety

Inspection Report: 05000373/2022010

Inspection Dates: January 10, 2022 – January 28, 2022

Inspection Procedure: Inspection Procedure 71003 “Post-Approval Site Inspection for License Renewal”

Lead Inspector: John V. Bozga, Lead Inspector
630-829-9613

I. Information Requested Prior to the On-site Inspection Week on December 27, 2021

The following information is requested by December 27, 2021, or sooner, to facilitate inspection preparation. If you have any questions regarding this information, please call the team leader as soon as possible. (Please provide the information electronically in “pdf” files, Excel, or other searchable formats, preferably on station/corporate online portal for document sharing. The electronic information should be identified by unit, contain descriptive names, and be indexed and hyperlinked to facilitate ease of use. Information in “lists” should contain enough information to be easily understood by someone who has knowledge of light water reactor technology.)

1. Provide a list of your license renewal commitments with an approximate completion status of each.
2. Provide a list of your Aging Management Programs (AMPs), copies of the program basis documents for each, and a listing of the action tracking items for each.
3. For AMPs that are one-time inspection programs, provide a list of completed work order numbers for inspections that have been completed. This may be incorporated with the previous item and should include identification of the inspected component.
4. Provide current management and license renewal organizational charts.
5. Provide electronic copies of Updated Final Safety Analysis Report, Technical Specifications, Technical Specifications Bases, and Technical Requirements Manual.
6. Provide copies of any internal/external self-assessments and associated corrective action documents generated in preparation for the inspection.

Enclosure

II. Information Requested to Be Available When the Inspectors Arrive On-Site on January 10, 2022

1. Documentation demonstrating completion of license renewal commitments completed as of the inspection date. For example, this may be in the form of a binder for each commitment which includes the implementing documentation and references.

III. Information Requested to Be Provided Throughout the Inspection

1. Copies of any corrective action documents generated as a result of the team's questions or queries during this inspection.
2. Copies of the list of questions submitted by the team members and the status/resolution of the information requested (provide daily during the inspection to each team member).

If you have questions regarding the information requested, please contact the lead inspector.
