Subject: Planned Issuance of License Amendment for Nine Mile Point Nuclear Station Unit 2 to Adopt TSTF-501, Rev. 1, "Relocate Stored Fuel Oil and Lube Oil Volume Values to Licensee Control," (EPID: L-2021-LLA-0096)

Good afternoon Alyse,

The NRC staff is preparing to issue the subject license amendment related to Nine Mile Point Nuclear Station Unit 2. A brief description of the license amendment request (LAR) is provided below. Additional information can be found in Exelon's (the licensee) submittal which is also referenced below by ADAMS accession number. Please let me know if you have any comments or questions regarding this licensing action **by October 31st**. The NRC staff's current projection for issuance of the amendment is November 2021.

Nine Mile Point Nuclear Station Unit 2, License Amendment Request to Adopt TSTF-501 "Relocate Stored Fuel Oil and Lube Oil Volume Values to Licensee Control," Revision 1

Application Date:

May 26, 2021 (ADAMS Accession No. ML21146A045)

Brief Description of LAR:

The amendment would revise Technical Specification (TS) 3.8.3, "Diesel Fuel Oil, Lube Oil, and Starting Air," by relocating the current stored diesel fuel oil and lube oil numerical volume requirements from the TS to a licensee controlled document. The TS would be modified so that the stored diesel fuel oil and lube oil inventory will require that a 7-day supply be available for each diesel generator. Condition A and Condition B in the Action table for TS 3.8.3 and Surveillance Requirements 3.8.3.1 and 3.8.3.2 would be revised to reflect the above change.

FR Publish Date:

The LAR was published in the Federal Register (FR) on July 13, 2021 (86 FR 36780) <https://www.govinfo.gov/content/pkg/FR-2021-07-13/pdf/2021-14642.pdf#page=5>. To date, no comments have been received from the public.

Thank you,

Brent Ballard
