When we talked back on 2/2/21, you thought you might be able to avoid another RAI if I could provide a cost estimate for the small amount of SNM inventory removal.

Here is what I got from Vallecitos.

If needed, we could transport our very small quantities of SNM material not disposed of as Radwaste at the Clive facility (i.e. the three WEP Drums) for under \$1000. We expect the drums to be disposed of during our summer waste campaign this year.

We could/would ship this material as a DOT Exempted quantity, and it likely ship via FedEx... very cost effective.

Let me know if we need to discuss.

Hi, Scott!

I left a voice mail a while ago. However, here is where we are:

1. The staff reviewed the responses to the RAI and determined that the response to Q3 was not adequate.
2. In coordination with OGC, a follow-up RAI was developed.
3. OGC provided comments that the staff addressed. OGC's final approval is pending.

As soon as I hear back from OGC we will be requesting management's concurrence and issue the follow-up RAI.

I apologize for the delay but things have been slow during the holidays and getting ahold of people here at that time is a challenge.

Let me know if there are any other questions.

Osiris

Can you provide a status update on the SNM 960 DFP approval process.

As I mentioned before, we would like to lower the current bond amount in March of this year.
