**I. Background**

On August 12, 2021, the NRC published a notice in the *Federal Register* informing the public that it will consider in the rulemaking process the issues raised in a petition for rulemaking regarding reporting requirements for nonemergency events at nuclear power plants (86 FR 44290). The NRC is in the early stages of developing a

regulatory basis document that will discuss the regulatory issues, alternatives to resolve those issues, and the NRC staff's recommended alternative. The NRC will consider the information shared at the meeting in the development of the regulatory basis document.

The purpose of the meeting is to provide background information on this rulemaking activity and obtain stakeholder input to enhance the NRC's understanding of the associated issues. Further, the staff will describe the various opportunities for the public to participate in the rulemaking process. The NRC will not provide formal written responses to the oral comments made at this meeting.
