

UNITED STATES  
NUCLEAR REGULATORY COMMISSION

REGION III  
2443 WARRENVILLE RD. SUITE 210  
LISLE, IL 60532-4352

October 25, 2021

John L. Bormann, M.D.  
Radiation Safety Officer  
Sturgis Hospital  
916 Myrtle Ave.  
Sturgis, MI 49091

SUBJECT: RENEWAL OF RADIOACTIVE MATERIALS LICENSE FOR STURGIS HOSPITAL,  
NRC LICENSE NO. 21-16475-01

Dear Dr. Bormann:

Enclosed is Amendment No. 23 renewing your U.S. Nuclear Regulatory Commission (NRC) Materials License No. 21-16475-01, in accordance with your May 27, 2021 renewal application. Please note that, based on the deletion of 10 CFR 53.300 material the primary program code for the license is changed from 2120 (Medical institution – Limited scope – Written directive required) to 2121 (Medical institution – Limited scope – Written directive not required). There is no change to the annual license fee category; however, the inspection frequency will be changed from three years to five years.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. NRC Region III office at (630) 829-9887 so that we may provide appropriate corrections and answers.

An environmental assessment for this action is not required because this action is categorically excluded under Title 10 of the *Code of Federal Regulations* (CFR) Section 51.22(c).

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation; or imposition of a civil penalty; or an Order suspending, modifying, or revoking your license as specified in the NRC Enforcement Policy. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance that NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <https://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice and Procedure," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's ADAMS, accessible from the NRC Web site at <https://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

Frank P. D. Tran  
Health Physicist  
Materials Licensing Branch
